NICOMGT™

NICHOLSON MANAGEMENT · MANAGEMENT GUIDE

NICOMGT™· WEB, IPHONE AND ANDROID

Three apps. One record. *Answered here.*

NicoMGT is the management console of Nicholson Group. Every tenant matter raised in Nicholson Living and every staff matter raised in NicoNet arrives here, is decided here and is answered from here. This guide sets out how the console works, how it connects the three apps, and the standard every manager is held to.

Tenants → Nicholson Living™ | Staff → NicoNet™ | Management → NicoMGT™ | Claude drafts · a manager sends | Every spend approved by Paul

ISSUED TO
Paul Nicholson (admin)
Kevin Sharp
Callum Hesketh

APPLIES TO
Nicholson Group and every company in it, including Nicholson Lettings Limited

ISSUED BY
Paul Nicholson, Founder and CEO

What this guide covers

1 The system: three apps, one record 3

2 Signing in and who sees what 5

3 Who answers what 6

4 The management day and what the system books 7

5 Never miss a booking 10

6 NicoMGT, section by section 14

7 How the apps work together 22

8 Service standards and escalations 25

9 Rules for managers 26

10 Quick answers 27

11 Acknowledgement 28

> If it is not in the apps, it did not happen. A promise made on WhatsApp, a repair agreed on the phone, or a holiday agreed in passing is invisible to the business, to the tenant's record and to any tribunal, ombudsman or court that later asks to see it.

THE AIM

Visible work

Every person sees their own work backing up, not just the CEO. Nothing waits silently in one person's inbox.

THE STANDARD

Professional, every time

Replies are drafted by Claude in the Nicholson house style and checked by a manager, so tone never depends on mood.

THE RECORD

One file per tenant, per person

Every message, decision, letter and job is logged automatically to the tenancy or staff record.

How to use this guide

Read Parts 1 to 5 once, in full, before your first shift on NicoMGT. Keep Parts 6 to 10 in the file as the working reference. Sign the acknowledgement on the last page and return it to Paul Nicholson. Where this guide and an app screen ever disagree, the app is the system of record: tell Paul the same day so the guide is reissued.

Screens in this guide are from the preview build, which uses example tenants, staff and figures. Names such as Jane Example and Sam Sample are fictitious.

THE SYSTEM

1 Three apps, one record

Three apps share one database. Each audience sees only what it needs. Management sees everything, and answers everything, in NicoMGT.

Nicholson™ Living

TENANTS AND APPLICANTS

- Report a repair, message the engineer
- Rent schedule, balance, time to pay
- Messages with the office
- Inspections, notice board, newsletter
- Consents: pets, occupiers, rent date
- Documents, certificates, invoices
- Extras, move or upgrade, refer a friend
- Applicant progress to move-in
- Notice (low-key, rent day only)

⇄

NicoMGT™

MANAGEMENT: PAUL, KEVIN, CALLUM

- Dashboard of everything waiting
- Tenant messages, Claude-drafted replies
- Maintenance: allocate, book, close
- Arrears, invoices, extras, referrals
- Tenants, applicants, consents, exits
- Staff requests: approve, decline, reply
- Spending approved by Paul with a PO
- Escalations when anything is late

⇄

NicoNet™

ALL STAFF AND SUBCONTRACTORS

- Clock in and out (location checked)
- My jobs: maintenance, construction, voids
- Reply to residents about their repair
- Materials, expenses, PPE, invoices
- Holiday, sickness, 1-2-1s, appraisals
- Safety: RAMS, accidents, lone working
- Handbook, policies, payslips, news
- My requests: every answer comes back here

The four rules that hold the system together

RULE 1

All tenant activity goes through Nicholson Living

From launch, tenants are communicated with only through the app. office@nicholsongroup.co.uk is for suppliers, external parties and letting enquiries. A tenant who emails or calls is answered, logged on their record in NicoMGT™ and pointed back to the app.

RULE 2

All staff activity goes through NicoNet™

No texts, WhatsApp, personal emails or phone calls for requests, absence, orders or paperwork. A manager who receives one asks the person to send it in NicoNet, so it is routed, timed and on file.

RULE 3

Both are answered in NicoMGT™

The answer to a tenant reaches their phone in Nicholson Living; the answer to a staff member reaches them in NicoNet → My requests. Nobody is answered by personal email, text or WhatsApp.

RULE 4

Paul approves all spending, however small

Materials, expenses and receipts, uniform and PPE, and subcontractor invoices are approved or declined by Paul Nicholson only. Approval issues a purchase order number. Nothing is bought without one.

SEPARATION BY DESIGN

Tenant matters are never visible in NicoNet. Cleaners, trades and site workers have no access to tenancy files, arrears or messages between tenants and the office. The single bridge is the repair conversation: a resident can message the engineer allocated to their repair, using **first names only, inside the apps only**. No phone numbers, email addresses or surnames are exchanged in either direction. Management sees every one of those conversations in NicoMGT → Maintenance.

What NicoMGT does for you

NicoMGT is not another inbox. It does the remembering, the booking, the chasing and the record-keeping, so each manager spends the day deciding and delivering, not searching through WhatsApp, Outlook and spreadsheets.

FOR MAINTENANCE, VOIDS AND CONSTRUCTION

Kevin's day

· Every repair arrives already logged, with photos, priority, target date and access permission.

· Allocating an engineer books the visit, puts it in the Maintenance calendar, puts it on the engineer's phone and tells the tenant, in one action.

· Check-out visits book themselves the moment notice is served, and move if the end date moves.

· Overdue jobs, reopened jobs and unanswered resident messages surface on their own.

· The Team league shows who is closing jobs.

FOR LETTINGS, OFFICE AND DEBT

Callum's day

· Claude drafts every tenant reply; you add the facts and send.

· Every phone number and email is in the Directory, one click from a call.

· Arrears are flagged at 09:00 with the tenant already messaged; you verify, agree time or clear.

· Applicants track their own six steps, so they stop phoning to ask.

· Consents, extras, invoices and referrals each have a queue and a deadline.

FOR THE CEO

Paul's day

· Every spend request arrives with items, supplier and cost; approve once, PO issued.

· Anything late escalates to you without anyone reporting it.

· Week-one 1-2-1s are booked for every starter automatically.

· Why tenants leave, repair feedback and the Team league measure the service, not opinion.

· The whole business is on record, ready for council, lender, ombudsman or court.

Before and after

TASK	BEFORE	WITH NICOMGT™
Booking a repair visit	Phone the tenant, phone the engineer, write it in a calendar, hope everyone remembers	Pick engineer and time once: calendar, engineer's phone and tenant updated together
Check-outs	Diarised by hand, often missed or late	Three visits booked automatically on notice, moved automatically if dates change
Finding a tenant's number	Search phones, emails, old spreadsheets	Directory: search, tap to call or email, download as a spreadsheet
Tenant chasing a repair	Calls to whoever answers	Messages the engineer in the app; engineer replies by 17:00 or it escalates
Staff requests	Texts and WhatsApps, lost or forgotten	Routed, timed, answered once, on file
Proving what we did	Reconstructed from memory	Every message, booking, decision and completion time-stamped on the record

ACCESS

2 Signing in and who sees what

Where NicoMGT runs

WHERE	USE IT FOR
Web · living.nicholsongroup.co.uk/nicomgt™	Desk work at Nicholson HQ: messages, the tenancy file, staff requests, the newsletter. The old /console address forwards here.
NicoMGT app · iPhone and Android	On the move: push notifications for new tenant messages, repairs and staff requests; approvals; replying from site. Published by Nicholson Lettings Limited and private to management.
NicoNet · Office menu	Managers use NicoNet like everyone else, plus an Office menu for New starters, Leavers and Site pins, so pins can be set from a phone standing on site.

Signing in

1. Enter your work email (pjn@, kjs@ or cjh@nicholsongroup.co.uk) and tap **Email me a sign-in code**.

2. Type the six-digit code from the email. There is no password to remember or share.

3. Allow notifications on the phone app. Badges on the menu show what is waiting; red badges are urgent.

NicoMGT opens only for an active management login. A staff login is refused and sent to NicoNet. When a manager leaves, their login is switched off the same day and their open items are reassigned.

CONFIDENTIAL ITEMS

A formal grievance and a confidential concern go to Paul only. A grievance concerning Paul goes to Kevin only, and Paul cannot see it. Alert emails for confidential items carry no detail, only that one is waiting.

Who sees what

PERSON	SEES
Tenant	Their own tenancy only. The database refuses any attempt to read another tenancy.
Applicant	Their own six-step progress to move-in, then the resident app on move-in.
Employee	Their own jobs, records, requests and company pages.
Subcontractor	The same, with Site sign-in and Work orders & invoices in place of employee-only pages.
Engineer on a repair	The job, the address and the resident's first name. No surname, no phone number.
Manager	Everything, in NicoMGT, except confidential staff items routed to someone else.

OWNERSHIP

3 Who answers what

Every staff request type is routed automatically to named managers, and every tenant matter lands in a shared office queue. If an item reaches you, it is yours until it is Done. Anything marked urgent runs on the one-hour clock; records needing no decision are filed as Logged, with no alert.

ADMIN

Paul Nicholson™

Founder and CEO. Approves or declines all spending with a purchase order. Holiday and family leave with Callum. Grievances and confidential concerns. 1-2-1s with Paul, the week-one 1-2-1 with every starter, feedback and nominations, staff referrals. Receives every escalation.

MAINTENANCE, VOIDS, CONSTRUCTION

Kevin Sharp

Allocates engineers and books visits. Inspections and the three check-out visits. Sickness, absence, accidents and vehicle defects with Paul. Clock-in approvals, keys and tools, lone working, compliance, void forms, job and site queries. Escalation point for unanswered resident messages.

OFFICE, LETTINGS, DEBT

Callum Hesketh

Tenant messages, applicants, consents, extras, referrals and invoices. Leads the debt collection team on arrears and damage invoices. Pay, payslip and CIS queries, records and paperwork, policy sign-offs, general messages to the office. Holiday and family leave with Paul.

Staff request routing (NicoNet → NicoMGT)

REQUEST FROM NICONET™	GOES TO	ANSWER BY
Sickness · running late / can't attend · accident or near miss · vehicle defect	Kevin and Paul	1 hour, then escalated to Paul
Materials & orders · expense or receipt	Paul (spend)	24 hours; approval issues a PO
Uniform & PPE	Paul and Kevin (spend)	24 hours; Paul approves
Subcontractor invoice	Paul and Callum (spend)	24 hours; Paul approves
Holiday · family leave or time off	Paul and Callum	24 hours
Return to work · 1-2-1 request · appraisal	Kevin and Paul	24 hours
Job, site or materials query · void form · clock-in approval · keys & tools · lone working · compliance	Kevin	24 hours
Pay, payslip, CIS or invoice query · records & paperwork · policy sign-off	Callum	24 hours
Message to the office	Callum and Paul	24 hours
1-2-1 with Paul · feedback & nominations · staff refer a friend	Paul	24 hours
Formal grievance · confidential concern	Paul only	24 hours, confidential
Grievance concerning Paul	Kevin only	24 hours, confidential
Week-one 1-2-1 with Paul	Paul and line manager	Mark Held by 11:00 on the day

RHYTHM

4 The management day

The apps run to a fixed clock. Managers work to the same clock, so nothing becomes an escalation by accident.

07:00 **Escalation checks start.** Every 15 minutes until 20:00, unanswered staff requests past their answer-by time are emailed to Paul once.

07:30 **Sickness deadline.** Staff report sickness in NicoNet by 07:30 on the first day off. It lands with Kevin and Paul on the one-hour clock.

07:50 **Clock-in deadline.** Staff clock in on site by 07:50 for an 08:00 start; lateness is messaged in NicoNet before 07:50. Clock-in approvals go to Kevin.

08:00 **Working day starts.** Rent reminders go to tenants three days before their rent date; alarm-test prompts go out on the 1st and 8th of the month.

08:05 **Applicants roll over.** Anyone whose tenancy has started drops off Applicants and opens the resident app with the same login.

08:30 **Maintenance catch-up.** Daily review of Maintenance: overdue jobs, no engineer yet, reopened jobs, tomorrow's bookings.

08:45 **Rents marked paid.** The morning bank reconciliation marks each received rent paid in the tenant's rent schedule.

09:00 **Arrears.** Weekdays: any rent due today and not received is arrears. The tenant gets a message in their Rent conversation, a banner and a push; extras and requests are suspended until cleared. Weekend rents are checked the next working day.

Day **Work the Dashboard.** Clear Messages, Staff requests and Maintenance first; then Consents, Arrears, Invoices, Extras and Referrals.

16:00 **Working day ends.** No overtime. Check nothing urgent is left on Seen without an answer.

17:00 **Engineer reply deadline.** A resident's message must be answered by the engineer by 17:00 that working day (by 17:00 next working day if sent after 17:00 or at a weekend). Unanswered: emailed to Kevin, or to Paul when Kevin is the engineer.

19:00 **Daily close.** Net cash for the day, maintenance reported against completed, change in available homes and payments due tomorrow.

Wkd **Weekends.** The office is closed. Check-outs that fall on a weekend or bank holiday move to 11:00 on the next working day. The emergency line covers genuine emergencies only.

EMERGENCIES

A possible gas leak, fire, flood, electrical danger or anyone at risk is never handled by message alone. When the console flags a possible emergency, tell the tenant to call 0800 111 999 (gas) or 999, log an Emergency repair, and phone the emergency engineer. Then record what was done on the repair.

What the system books for tenants

These are scheduled automatically the moment the trigger happens. Nobody books them by hand, and nobody can forget them. Your job is to attend, complete and record.

Tenants · Nicholson Living™

WHAT	TRIGGERED BY	WHEN	WHERE IT SHOWS · WHAT YOU DO
Check-out 1 of 3 · pre-check-out	Notice served in the app	10:00 on the last working day on or before one month before the end date	Inspections, Calendar, Maintenance calendar, with Kevin. Walk the inventory with the resident; list cleaning, damage and missing items.
Check-out 2 of 3 · follow-up	Same notice	10:00 two weeks later, a working day at least two days before the end date (dropped if the notice leaves too little time)	Same. Check the works are done or ordered; anything not done is charged at our cost.
Check-out 3 of 3 · check-out and keys	Same notice	11:00 on the end date; 11:00 the next working day if a weekend or bank holiday	Same. Keys back, final check. End date and rent unchanged.
Check-out letter and guides	Same notice	At once	Resident's Messages (Your check-out) and My documents.
Changes to check-outs	End date changed or notice withdrawn	At once	Visits move or cancel automatically and the resident is told. A visit moved by hand keeps its time unless the end date changes.
Rent reminder	Rent schedule	08:00, three days before the rent date	Push to the tenant.
Arrears message	Rent not marked received	09:00 on the rent date (weekdays); days 3, 7, 14, then weekly	Rent conversation, banner and push. Clear it in Arrears.
Alarm test prompt	Calendar month	08:00 on the 1st; reminder on the 8th if not yet tested	Push; a failed test shows on the Dashboard.
Repair feedback	Engineer closes the job	At once	Tenant asked what they thought; "Not fixed" reopens the job.
Trustpilot invitation	Tenancy start date	30 days after move-in, then each anniversary	In the app, for every tenant, whatever their feedback.
Applicant to resident	Moved in, or start date passed	08:05 daily	Leaves Applicants; same login opens the resident app.

What the system books for staff

Staff · NicoNet™

WHAT	TRIGGERED BY	WHEN	WHERE IT SHOWS · WHAT YOU DO
Weekly fire inspections	Every Monday	11:00, every Monday; must be Done by 16:00 the same day	Urgent item in Staff requests for everyone on NicoMGT, emailed with the full checklist and every block. Not Done by 16:00, even if marked Seen: escalated to Paul.
Week-one 1-2-1 with Paul	New starter added, or an employee's start date set	09:00 at Nicholson HQ on the Monday after the first week (the first Monday after the fifth working day; Tuesday if a bank holiday)	Staff requests for Paul and the line manager; starter's My day. Mark Held with notes; not held by 11:00, it goes to Paul. Change the first day and it moves.
Escalations	Any staff request unanswered	Checked every 15 minutes; 1 hour or 24 hours	Emailed to Paul once.
Resident message escalation	Engineer has not replied	17:00 the working day, checked every 15 minutes on weekdays	Emailed to Kevin, or Paul when Kevin is the engineer.

WEEKLY FIRE INSPECTIONS · THIS ONE IS CRITICAL

Every Monday, 11:00 to 16:00

Every block with communal areas, every week, without exception. The alarm lists the buildings and seven checks:

1 Fire alarm test: a different call point each week, recorded; every sounder heard; panel reset, no faults. **2 Emergency lighting test**: every fitting lights; none failed or damaged. **3 Fire doors**: closers shut and latch fully; no broken or missing D handles; seals, hinges, glazing and signs intact; nothing wedged open. **4 AOVs and smoke vents**: closed, undamaged, panel healthy, override clear. **5 Escape routes**: corridors, stairs and exits clear of everything; exit doors open easily. **6 Extinguishers, blankets and notices**: present and in date. **7 Record and act**: fire log book completed; every defect raised as a repair today (Emergency where it affects detection, lighting or escape); then mark Done with the buildings, who checked and the repair references.

The duty is ours as the responsible person under the Regulatory Reform (Fire Safety) Order 2005. A missed week is a breach, and the record is the proof that we did it.

BOOKED BY A MANAGER, NOT THE SYSTEM

Routine and mid-term inspections, gas, electrical and fire safety visits, and repair visits are booked by a manager in NicoMGT (Inspections or Maintenance); the tenant is then notified automatically, with at least 24 hours' notice enforced. Ongoing 1-2-1s and appraisals are booked when a staff member requests one in NicoNet, or when a manager arranges one.

BOOKINGS

5 Never miss a booking

The system books a great deal for you. That only helps if you look in the right place. Every booking appears in at least three places, so there is no excuse for a missed visit. Know where they are, and check them on the routine below.

Where every booking shows

BOOKING	BOOKED BY	NICOMGT™	OUTLOOK AND NICONET™	THE TENANT OR STAFF MEMBER SEES
Repair visit	Manager, on Assign and book	Maintenance (Visit column), Calendar	Maintenance calendar with 1-hour reminder; engineer's NicoNet › My jobs	Appointment message and push; visit card on Home; can message the engineer
Routine, mid-term, safety inspection	Manager, in Inspections	Inspections (Tenant answer column), Calendar, Dashboard "Inspections this week"	Maintenance calendar	Notice with window and purpose; answers I'll be home, Use your keys or Rearrange
Check-out 1, 2 and 3 of 3	System, on notice	Inspections (with notice reference), Calendar	Maintenance calendar	Ending your tenancy, Inspections, Home visit card; check-out letter in Messages
Rearrange request	Tenant	Dashboard "asked to rearrange", Inspections	Calendar moves when you move the visit	New time confirmed in the app
Week-one 1-2-1	System, on new starter	Staff requests (Paul and line manager)	Starter's NicoNet › My day	Date, time and place on My day
1-2-1 or appraisal requested	Staff member, in NicoNet™	Staff requests	Answer in My requests	Your reply with the agreed time

SET UP YOUR PHONE ONCE

Add the Maintenance calendar

In the Outlook app: Calendar › Add calendar › Shared calendars › Maintenance. Every repair visit, inspection and check-out then reaches your phone with a 1-hour reminder. Turn on NicoMGT notifications so new messages, repairs and staff requests reach you as they happen.

THE ONE RULE

Book in NicoMGT, never straight into Outlook

A visit typed straight into Outlook is invisible to the tenant, the engineer's NicoNet and the record. If it is not booked in NicoMGT, it is not booked.

Your check routine

Ten minutes at fixed times stops every missed appointment. Each manager runs the checks for their own area; Kevin owns maintenance and inspections, Callum owns tenant messages and applicants, Paul owns staff requests and approvals.

Every morning, 08:00–08:30 — DAILY

1	CALENDAR	Today and tomorrow. Every visit has an engineer or inspector; nobody is double-booked; access is clear (keys or tenant home).
2	DASHBOARD	Inspections this week and asked to rearrange. Move anything the tenant asked to change before it becomes a wasted trip.
3	INSPECTIONS	Tenant answer column. No answer and no permission to use keys: message the tenant today.
4	MAINTENANCE	No engineer yet, Overdue and Reopened views. Allocate and book before 09:00.
5	STAFF REQUESTS	Sickness and absence first: reallocate that person's visits in Maintenance and the tenant is told the new time.

Every Monday, 09:00 — WEEKLY LOOK-AHEAD

1	CALENDAR	This week and next. Holidays in NicoNet against bookings: no visit with someone who is off.
2	INSPECTIONS	Every check-out in the next 14 days. Engineer free, inventory ready, keys arranged.
3	STAFF REQUESTS	Week-one 1-2-1s this week, and any 1-2-1 or appraisal requested.
4	FIRE	11:00: the weekly fire inspections alarm. Agree who covers which blocks and have it Done by 16:00.

After every visit — SAME DAY

1	NICONET™	Engineer closes the job with what was done, so the tenant is told and asked for feedback.
2	INSPECTIONS	Inspector marks the visit completed with the outcome summary.

Every Friday, before 16:00 — CLOSE THE WEEK

1	CALENDAR	Next Monday and Tuesday fully allocated and confirmed.

What it tells you, and what you must check

IT TELLS YOU

Push and email for new tenant messages, repairs and staff requests; escalation emails when anything is late; red badges on the menu; the 1-hour reminder from the Maintenance calendar.

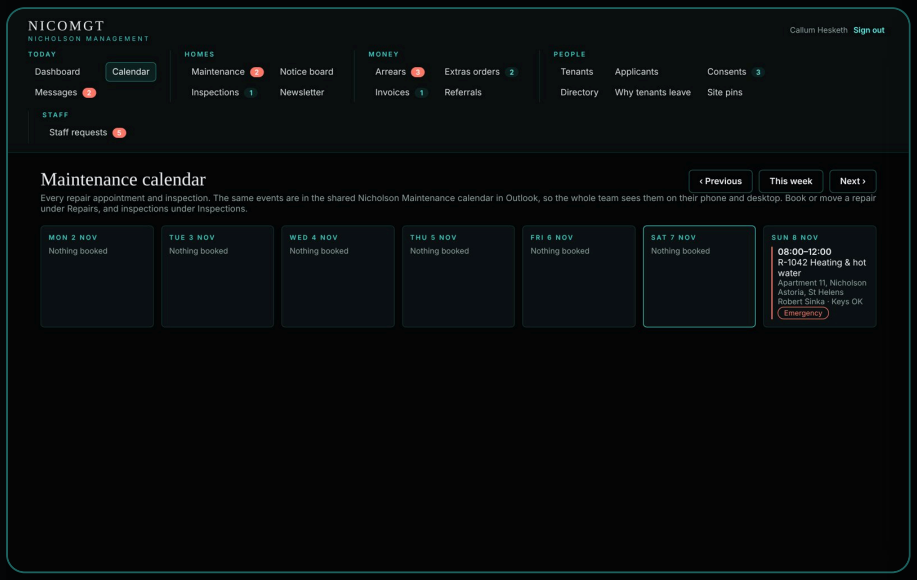

YOU MUST CHECK

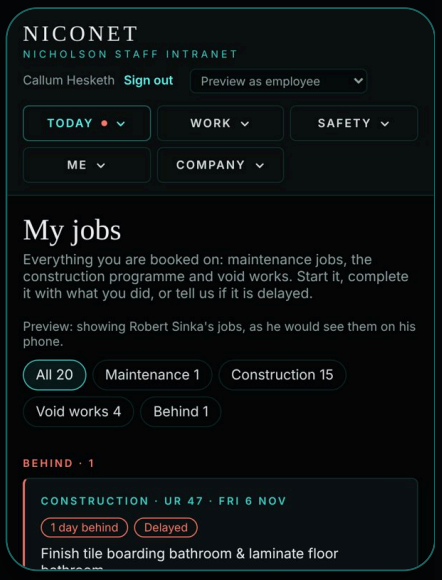

That every booked visit has a person free to attend, that the tenant has answered, that rearrange requests have been moved, and that completed visits are closed. The system cannot know someone is ill until it is reported in NicoNet.

Booking an engineer, step by step

When a repair needs a visit, one booking in NicoMGT does the rest. This is the full sequence, and what the system does at each step.

You do	NICOMGT › MAINTENANCE	The system does	AUTOMATIC
1	OPEN — Open the job. Read the report, the photos, the priority, the target date and the tenant's access permission.	1	CALENDAR — Adds it to the shared Maintenance calendar as "Robert S – MAINTENANCE – R-1042", with tenant, phone, access, job sheet and a 1-hour reminder.
2	ENGINEER — Under Assign and book, choose the engineer: any employee or subcontractor on NicoNet. Check the Calendar that they are free.	2	NICONET™ — Puts the job on the engineer's My jobs under Today, Next 7 days or Later, with address, access and the resident's first name.
3	VISIT — Set status Booked in, the date and the from–to window. Book within the target date.	3	LIVING — Tells the tenant the appointment window and who is coming, with a push; it shows on their Home screen.
4	SAVE — Save. That is the whole booking.	4	CHANGE — A moved or cancelled visit moves or comes off the calendar, and the tenant is told the new time.
5	CHANGE — To move it, change the date or window and save. To swap engineer, choose the new one. Everything updates again.	5	CLOSE — When the engineer completes it in NicoNet: Completed Maintenance Register, tenant told what was done and by whom, feedback requested.

Left: NicoMGT › Calendar, the week of visits and inspections. Right: the engineer's NicoNet › My jobs, where the booking lands.

Operatives messaging tenants directly

The engineer allocated to a repair can message the tenant directly, and the tenant can message the engineer, inside the apps. It cuts out the office relay, it makes the engineer accountable for the appointment, and every word is on record.

How it works

Opens the moment an engineer is allocated to an open repair. **Closes**, read-only, when the repair is completed.

The engineer taps **Message [resident's first name]** on the job in NicoNet › My jobs, at any time: "On my way, there in 20 minutes", "I need access to the loft", "Part ordered, back Thursday". The tenant gets a push in Nicholson Living.

The tenant taps **Message [engineer's first name]** on the repair. The engineer is emailed a prompt to open NicoNet (no address, name or message in the email) and must answer by 17:00 the same working day, or by 17:00 the next working day if sent after 17:00 or at a weekend.

Unanswered by then: emailed to Kevin, or to Paul when Kevin is the engineer.

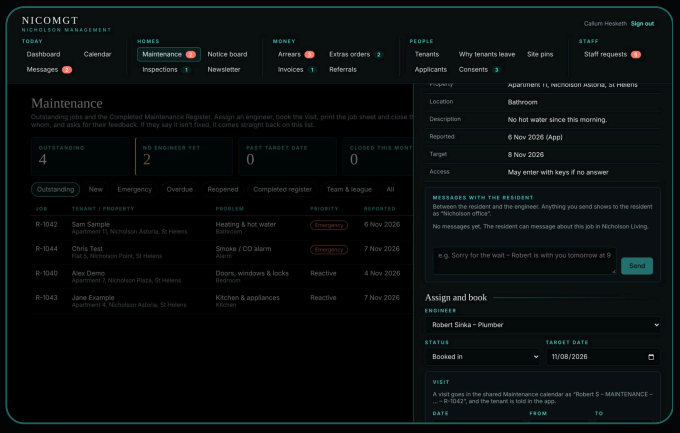

The office sees every conversation on the job in NicoMGT › Maintenance and can reply as "Nicholson office", never under a personal name.

RULES FOR OPERATIVES

First names only. No phone numbers, emails, WhatsApp or social media in either direction. Keep it to the job: arrival times, access, what is needed. Polite and professional, as Service with Respect sets out. Every reply to a tenant is checked by Claude before it is sent. Operatives no longer see the tenant's surname or phone number in My jobs; the office still does.

MANAGERS CHECK

Open Maintenance each morning and look for jobs with an unanswered resident message. Step in as "Nicholson office" if an engineer is off sick or on another job, then reallocate. A resident who has waited past 17:00 has already been escalated; fix it, do not just apologise.

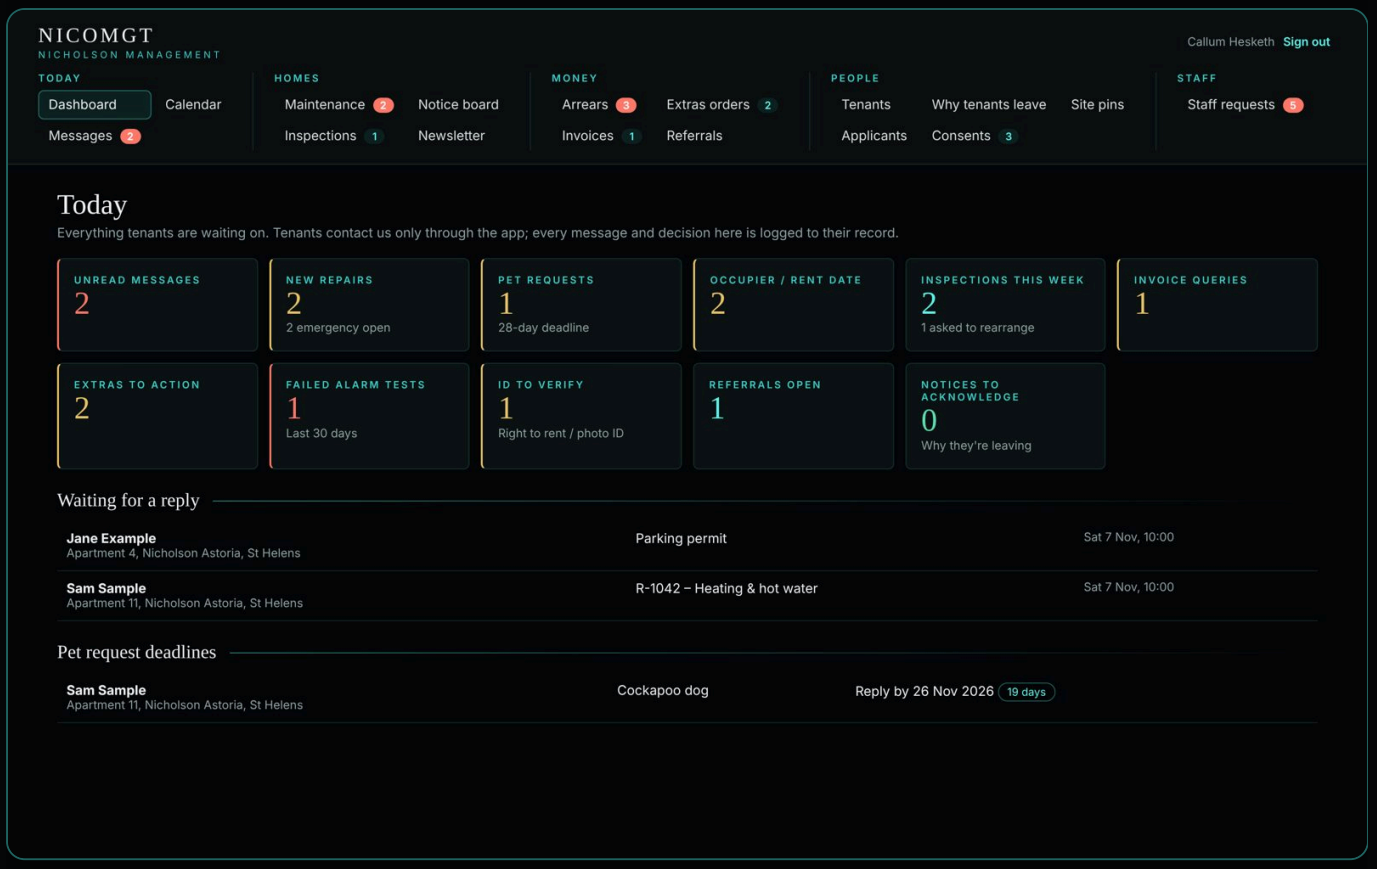

The resident–engineer conversation on the job in NicoMGT › Maintenance.

THE CONSOLE

6 NicoMGT, section by section

The menu runs across the top in five groups: **Today**, **Homes**, **Money**, **People** (including the **Directory**) and **Staff**. Each page carries a badge count of what is waiting. Work left to right.

Today › Dashboard. Every count is a link. Red edges are urgent; amber has a deadline.

Today › Dashboard

Everything tenants are waiting on: unread messages, new repairs (emergencies called out), pet requests against their 28-day deadline, occupier and rent-date requests, inspections this week and any asked to rearrange, invoice queries, extras to action, failed alarm tests, ID and right to rent to verify, open referrals and notices to acknowledge. Below: **Waiting for a reply**, oldest first, and **Pet request deadlines**.

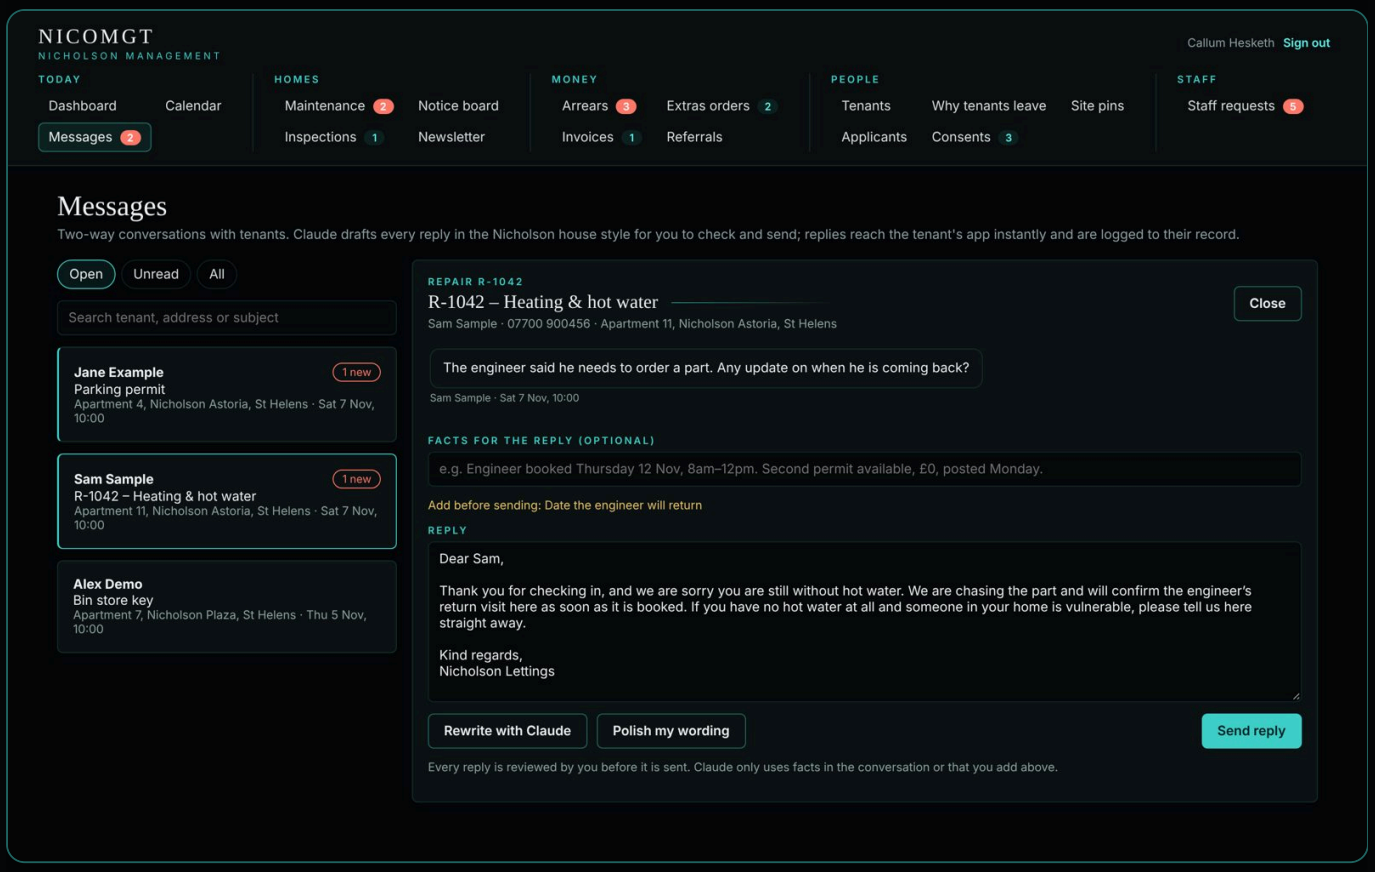

Your job: take every count to zero, or to a documented next step, before 16:00.

Today › Calendar

A week view of every repair visit and inspection, built from the same bookings as the shared Maintenance calendar in Outlook. Booking or moving a visit in NicoMGT moves the calendar entry; rejecting a repair or cancelling an inspection removes it. Each entry starts with the engineer as first name and initial (for example "Robert S – MAINTENANCE – R-1042").

Rule: book visits in NicoMGT, never straight into Outlook, so the tenant is told and the record matches.

Every tenant conversation, drafted by Claude

A tenant conversation open with Claude's draft. Facts for the reply go in the box above it; nothing is sent until a manager presses Send reply.

Two-way conversations with tenants, filtered Open, Unread or All, searchable by tenant, address or subject. When a conversation opens, **Claude drafts the reply** in the Nicholson house style: polite, professional, UK English, signed "Kind regards, Nicholson Lettings", with no invented facts.

To reply: add the facts Claude does not have in **Facts for the reply** (for example "Engineer booked Thursday 12 Nov, 8am–12pm"), press **Rewrite with Claude**, check every word, then **Send reply**. If you write a reply yourself, press **Polish my wording** before sending.

The reply reaches the tenant's phone instantly as a push and is logged to their correspondence record.

MESSAGE FLAGS

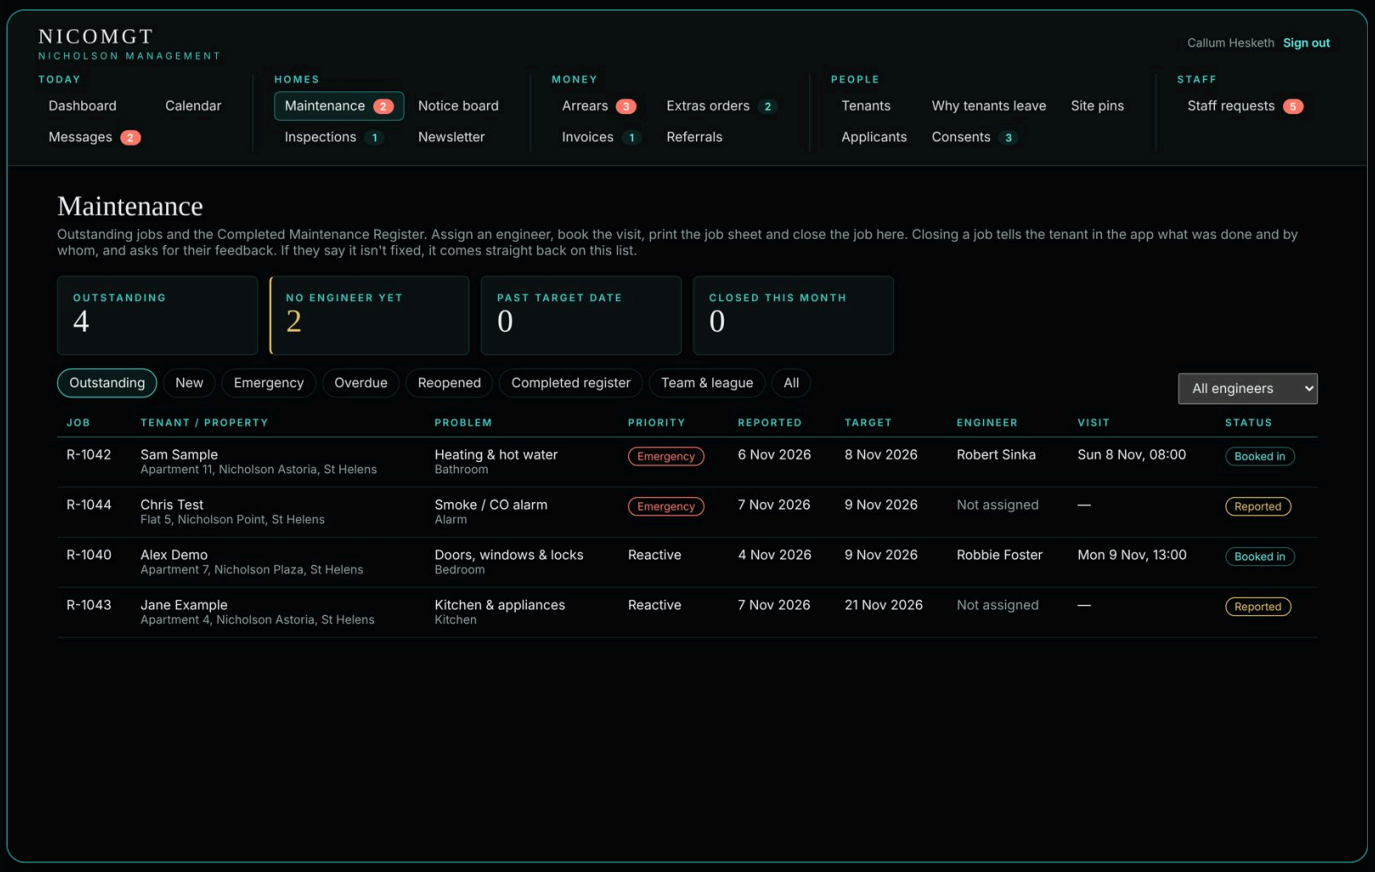

The console flags messages that need care before any reply:

- **Possible emergency**: follow the emergency rule in Part 4.
- **Service with Respect breach**: reply calmly, quote the policy, never match the tone.
- **Complaint**: acknowledge, investigate, answer in writing.
- **Money difficulty**: pass to the debt collection team before agreeing anything.
- **Legal point**: check with Paul before sending.

TONE

A manager having a bad day never shows it. If you would not want the message read out at a tribunal, do not send it.

Allocate, book, close, prove

Maintenance: outstanding jobs with priority, target date, engineer and status. Views for New, Emergency, Overdue, Reopened, the Completed register and the Team league.

Every repair from every source: the app, phone, inspections, planned works and voids. Headline tiles show **Outstanding**, **No engineer yet**, **Past target date** and **Closed this month**. The **Team & league** view ranks engineers by jobs closed.

Open a job to see the full report, photos, access permission and the resident–engineer conversation. Under **Assign and book**, choose the engineer, set the status and visit window. The visit goes into the shared Maintenance calendar, the job appears in the engineer's NicoNet → My jobs, and the tenant is told in the app.

The engineer closes the job in NicoNet with what was done. The tenant is told in Nicholson Living what was done and by whom, and is asked for feedback. If they tap **Not fixed**, the job comes back as Reopened.

PRIORITY	TARGET	ALARM (50% PAST)
Emergency	2 days	3 days
Reactive	14 days	21 days
Inconvenience	28 days	42 days

Past the target date a job shows red in Overdue. At the alarm point it is escalated by email to Kevin, Callum and Paul. Emergency jobs are made safe the same day; the target is for the full repair.

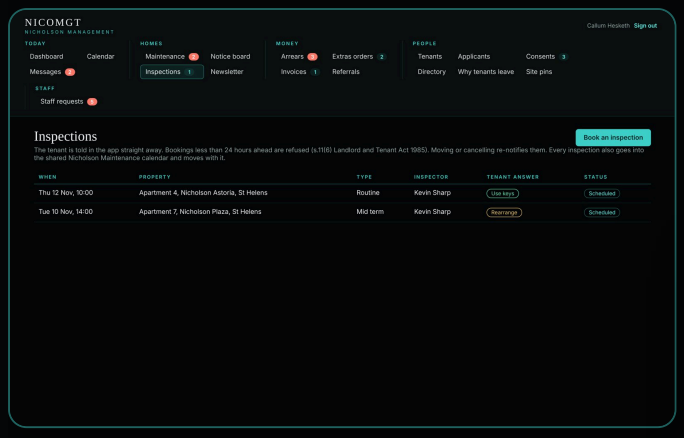

RESIDENT ↔ ENGINEER

On any open repair with an engineer, the resident can tap **Message [first name]**. The engineer answers in NicoNet → My jobs by 17:00 the same working day. You see every conversation on the job and can reply as "Nicholson office". The conversation locks when the job is completed.

HOMES › INSPECTIONS

Inspections and check-out visits

Book, move, cancel or complete an inspection. The tenant is told in the app with the inspector, window and purpose, and answers **I'll be home**, **Use your keys** or **Rearrange**. Bookings less than 24 hours ahead are refused (section 11(6) Landlord and Tenant Act 1985). When a notice is served, the three check-out visits are booked automatically (Part 6, flow F).

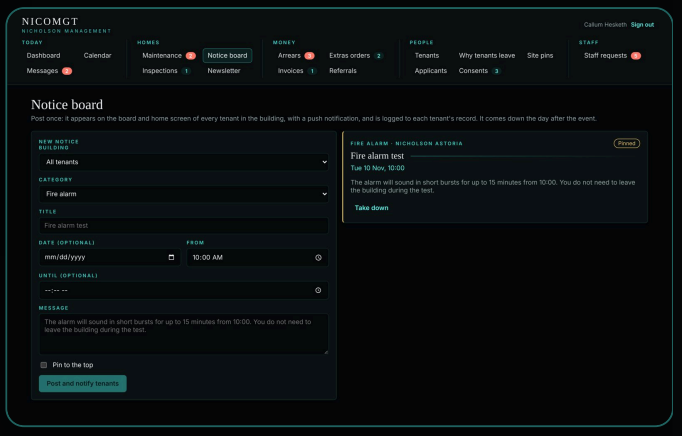

HOMES › NOTICE BOARD AND NEWSLETTER

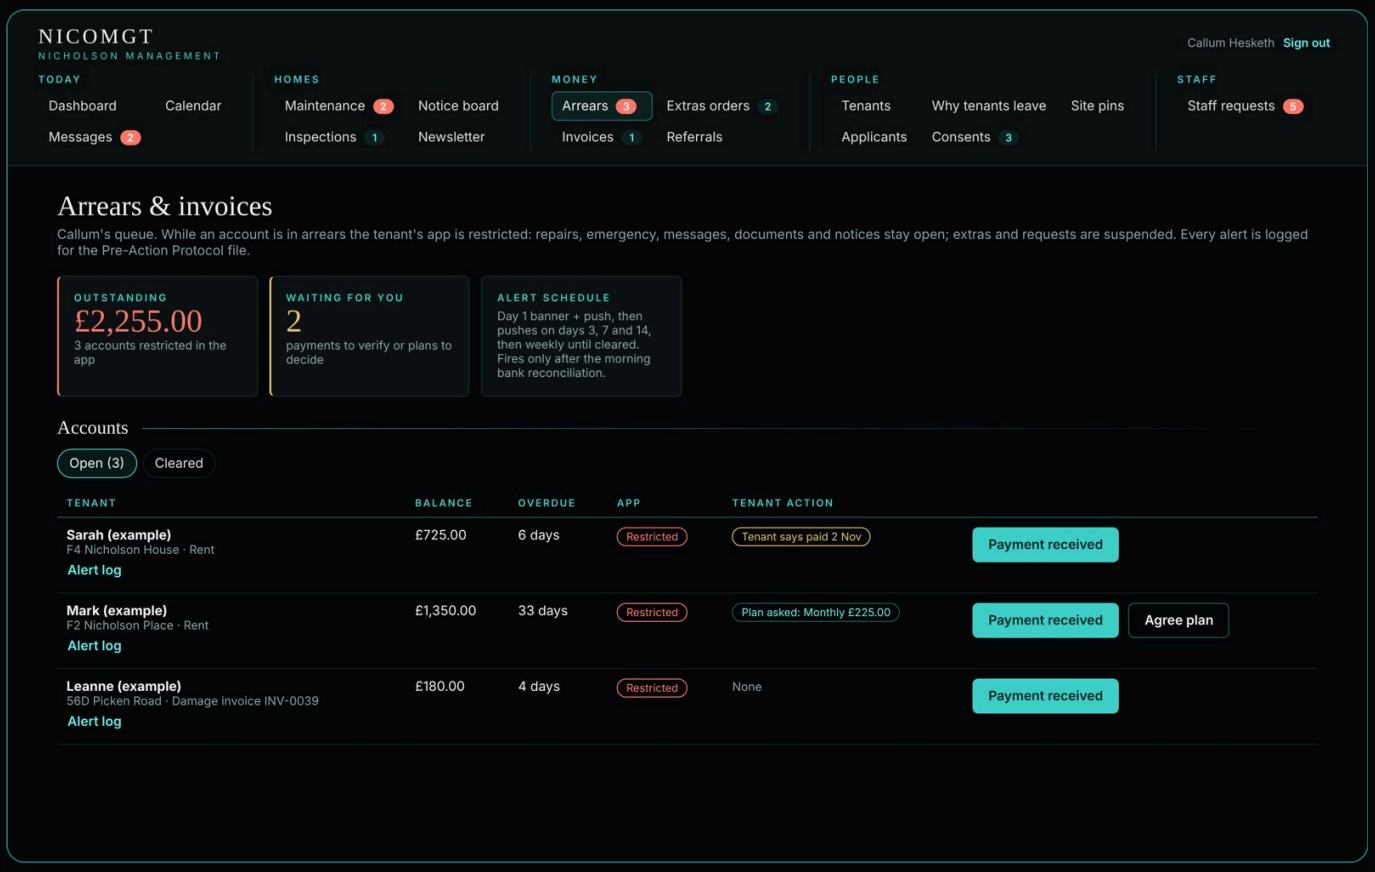

Building notices and the monthly newsletter

Post a notice once, to one building (for example Nicholson Astoria) or to every tenant: fire alarm tests, communal works, cleaning, utilities, security, urgent. Every tenant in that building gets a push and the notice is logged to their record; it comes off the board the day after the event.

The **Newsletter** drafts the monthly resident issue from the month's figures, notice board and market: new residents welcomed, maintenance performance, programmed works, inspections, app improvements, refer a friend, new homes, market commentary, and the staff member highlight. Counts and buildings only: **never name a resident**.

Money in, on record

Arrears & invoices: outstanding total, payments waiting for you to verify, and the alert schedule. Restricted accounts are marked in the App column.

Arrears

Rent not received by 09:00 on a weekday rent date is arrears. While an account is in arrears, the tenant's app is restricted: repairs, emergency reporting, messages, documents and notices stay open; extras and requests are suspended. The tenant sees **Pay now**, **I've paid** and **Payment plan**.

Alert schedule: day 1 banner and push, then pushes on days 3, 7 and 14, then weekly until cleared. Alerts fire only after the morning bank reconciliation, so nobody is chased for rent already paid.

Time to pay: a tenant may ask in the app for a day or two. Agree or decline, or record time agreed by phone in Tenants › Rent › Give time to pay. **Three days is the maximum.** The rent still shows as owed and as arrears, with time granted; the 9am message is held until the agreed date.

To clear: verify the payment and press **Payment received**, or **Agree plan**. Either unlocks the app. Money difficulty goes to the debt collection team before anything is agreed.

Invoices

Damage invoices are raised in Square (Nicholson Lettings Limited) to the email address held in the app and mirrored here. Title them "Damage – check-out" or "Damage – routine inspection", itemise each repair and attach photos. The tenant can pay, agree a deposit deduction or query it. **Never add a damage invoice to the rent account.**

Extras orders

Early check-in, late check-out, cleaning, handyman, Refresh My Home, furniture to storage and Upgrade My Move In Experience are paid in the Nicholson Lettings Wix store. Match each request to its Wix order, then confirm the date or time in Messages.

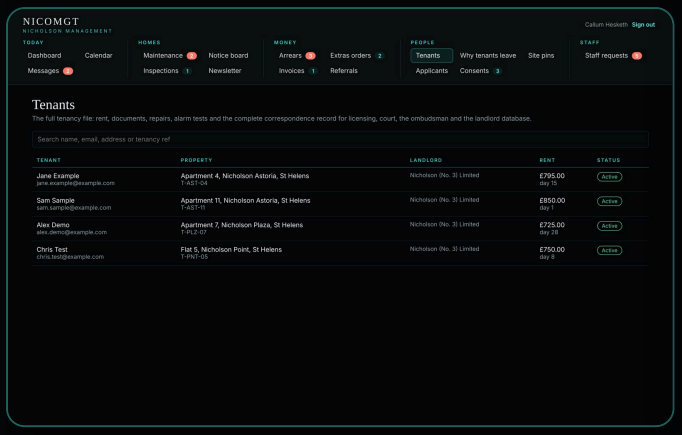

Referrals

Move each referral through contacted → applied → moved in → paid. The £50 reward is paid by bank transfer once the friend's tenancy has started and they have moved in. Bank details are taken by the office, never stored in the app.

The tenancy file and the people behind it

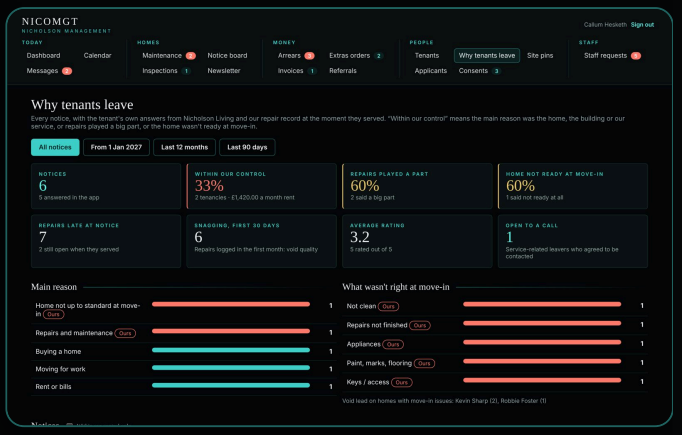

Tenants

The full tenancy file in one place: rent schedule, documents, repairs and works, alarm tests and the complete correspondence record. This is the file for licensing, court, the ombudsman and the landlord database. Use it to **log a call, letter or visit** and to **file a document**, so the record is complete even when contact happened outside the app. Notes marked internal never show to the tenant.

Why tenants leave

Every notice served in the app carries the tenant's answers: main reason for leaving, whether repairs played a part, and whether the home was ready at move-in. This page totals them: share within our control, rent at risk, repairs and move-in failures, and lists what was not right at move-in. It is the evidence base for what voids and maintenance are really costing.

Applicants

Add a new applicant with the email they will sign in with. They follow six steps in Nicholson Living: referencing forms · referees · contract sent · contract signed by all parties · three move-in conditions (balance paid, deposit or Reposit, standing order) · move-in time confirmed. The move-in time cannot be confirmed until all three conditions are met. Standard check-in is 15:00–17:00 on move-in day. On move-in they drop off this page and the same login opens the resident app.

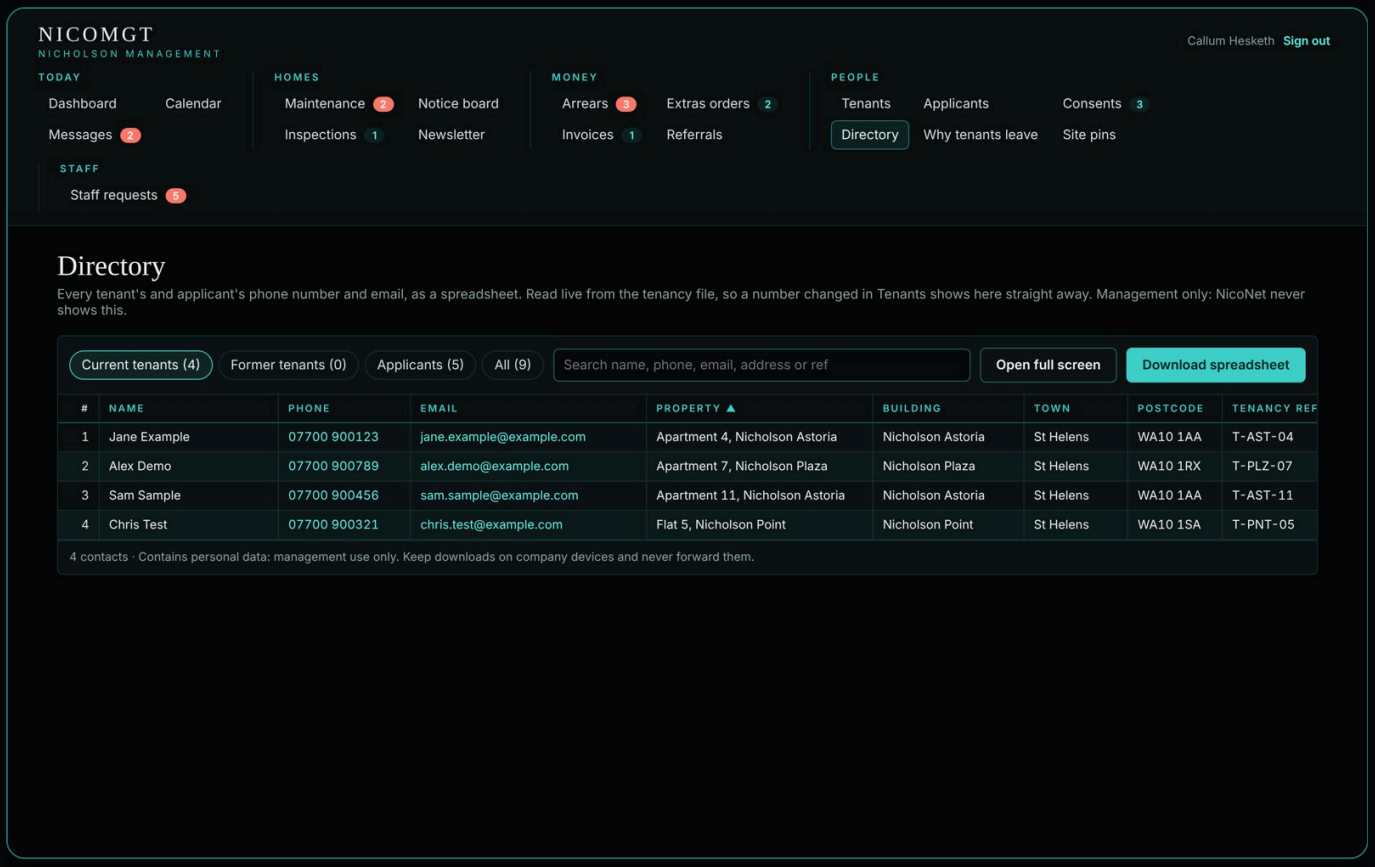

Consents

Pets: reply by the 28-day date shown. Agree, agree with conditions, ask for more information, or refuse with written reasons (a refusal without reasons is rejected by the system). **Occupiers:** run right to rent checks for adults before approval; an authorised occupier has no tenancy rights. **Rent date:** agree a new day (1–28), free of charge, with the apportioned bridging payment shown. Decision letters are generated as PDFs and filed to the tenant's My documents automatically.

Site pins

The GPS pins and radius for each clock-in site (Nicholson HQ, live schemes). Set a pin standing at the site entrance. Until a site has a pin, clock-ins there are flagged.

Every tenant's number and email, in one spreadsheet

NicoMGT › People › Directory. Tap a number to call, an email to write. Click any column heading to sort.

The Directory holds the phone number and email of every tenant and applicant, with property, building, postcode, tenancy reference, landlord company, rent day and status. It is **management only**: it is on the NicoMGT menu and never appears in NicoNet, so cleaners, trades and site workers never see tenant contact details.

Filter by Current tenants, Former tenants, Applicants or All. **Search** any name, number, email, address or reference. **Open full screen** pops the spreadsheet open across the whole screen. **Download spreadsheet** saves exactly what you are looking at as a file that opens in Excel or Numbers, with phone numbers kept intact.

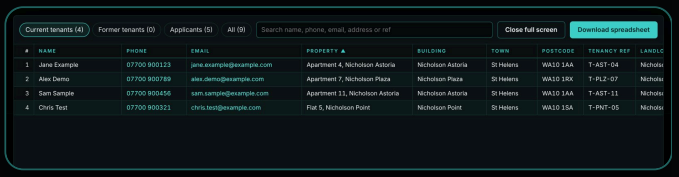

It reads live from the tenancy file. There is no second list to keep up to date: change a number on the tenant's file in **Tenants** and the Directory shows it immediately. Missing numbers or emails are shown in red so they can be completed.

PERSONAL DATA

Tenant contact details are personal data. Use them for the tenancy only. Keep any download on a company device, delete it when finished, and never forward it, post it in a group chat or give a number to a contractor. Engineers reach tenants through the apps, first names only.

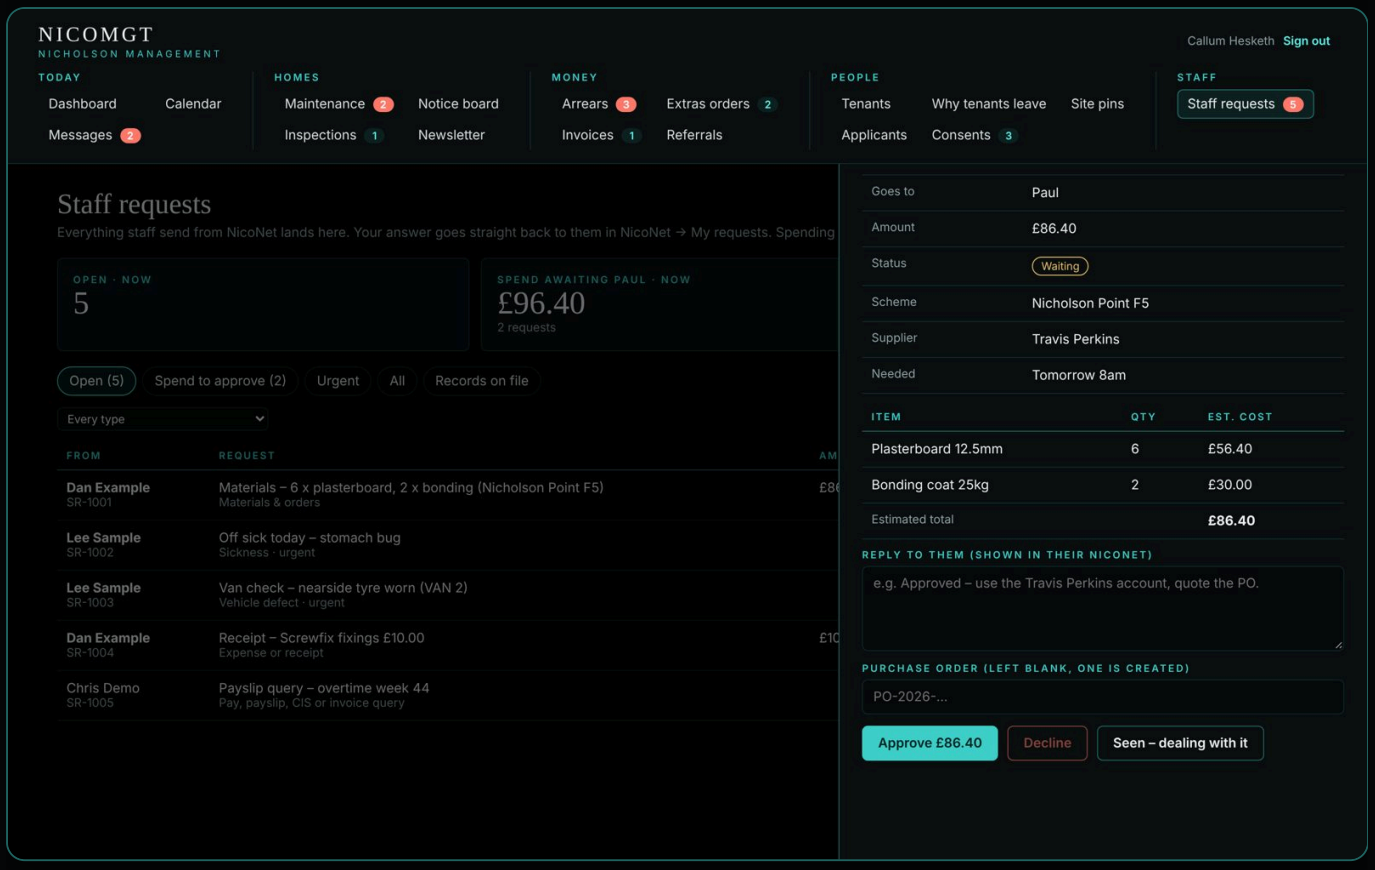

WHEN TO USE IT

Calling a tenant about access on the day, the debt collection team's calls, emergencies, and tenants who cannot use a smartphone. Log every call on the tenant's record in Tenants › Log a call, so the conversation is on file.

Open full screen: the spreadsheet across the whole screen.

Everything staff send, answered once

A materials request open for decision: items, quantities, estimated cost, supplier and the purchase order field. Approve, Decline (reason required) or Seen – dealing with it.

Every NicoNet form writes one request here: sickness, running late, accidents, van checks, materials, receipts, uniform and PPE, subcontractor invoices, holidays, return to work, 1-2-1s, appraisals, messages to the office, sign-offs and records. Filter by **Open**, **Spend to approve**, **Urgent**, **All** and **Records on file**.

Three buttons, three meanings. Seen – dealing with it tells the sender it is in hand and stops them chasing. **Done** or **Approve** closes it. **Decline** needs a reason, which the sender reads in NicoNet. Whatever you write in **Reply to them** appears in their NicoNet → My requests.

SPENDING

Only Paul can approve spending of any amount. Approval creates a purchase order number (PO-2026-...), which the operative quotes at the supplier and photographs on the receipt. Kevin and Callum can mark spend requests Seen and add notes, but cannot approve them.

ALERTS

Routed managers are emailed from office@ for each new request, with a link straight to it. Anything not picked up within 1 hour (sickness, absence, accidents, vehicle defects, urgent) or 24 hours (everything else) is emailed to Paul.

INTERPLAY

7 How the apps work together

Each flow shows where an event starts, where management acts and where the answer lands. LIVING Nicholson Living · NICOMGT™ management · NICONET™ staff · AUTOMATIC the system.

A · A repair, from report to feedback

MAINTENANCE

1	LIVING	Tenant reports a repair: category, priority, photos, access permission. They get an acknowledgement in Messages summarising the repair and access.
2	NICOMGT™	The job appears in Maintenance and on the Dashboard. Kevin allocates an engineer and books the visit window.
3	AUTOMATIC	Visit added to the shared Maintenance calendar; job added to the engineer's NicoNet™ → My jobs; tenant told the appointment in the app.
4	LIVING NICONET™	Resident and engineer message each other on the job, first names only. Engineer answers by 17:00; if not, Kevin is emailed (Paul if Kevin is the engineer). Management can reply as "Nicholson office".
5	NICONET™	Engineer completes the job with what was done (and photos). Materials needed are requested in NicoNet and approved by Paul with a PO first.
6	AUTOMATIC	Repair closed and added to the Completed Maintenance Register; tenant told what was done and by whom, and asked for feedback. "Not fixed" reopens it in NicoMGT.

B · A staff spending request

STAFF REQUESTS

1	NICONET™	Operative requests materials against a job or scheme: supplier, items, quantities, needed-by date, estimate.
2	AUTOMATIC	Paul (and Kevin for PPE, Callum for subcontractor invoices) emailed from office@ with a link to NicoMGT → Staff requests.
3	NICOMGT™	Paul approves (PO number issued) or declines with a reason. Not picked up in 24 hours: escalated to Paul.
4	NICONET™	Operative sees the decision and PO in My requests, quotes the PO at the supplier and photographs the receipt.

C · Sickness, lateness, accidents

STAFF REQUESTS · 1-HOUR CLOCK

1	NICONET™	Sickness reported by 07:30 on the first day; lateness before 07:50 with the expected arrival time; accidents and near misses the same day.
2	NICOMGT™	Kevin and Paul mark it Seen, reallocate that day's jobs in Maintenance, and reply. Not picked up in 1 hour: escalated to Paul.
3	NICONET™	On return, the employee completes Return to work; it routes to Kevin and Paul.

D · Rent day and arrears

MONEY

1	AUTOMATIC	Three days before the rent date at 08:00, the tenant is reminded that rent is paid by standing order.
2	AUTOMATIC	By 08:45 on the rent date, received rents are marked paid in each tenant's rent schedule from the bank reconciliation.
3	LIVING	At 09:00 (weekdays) unpaid rent becomes arrears: Rent conversation message, banner, push, app restricted. Tenant can pay, say they have paid, ask for time (max 3 days) or propose a plan.
4	NICOMGT™	Callum's team verifies, agrees time or a plan, or presses Payment received. The team also calls and messages. Money difficulty goes to the debt collection team first.

E · Applicant to resident

PEOPLE

1	NICOMGT™	Applicant added in Applicants with their email.
2	LIVING	They sign in with an emailed code and follow their six steps; management updates each step and notes in NicoMGT.
3	AUTOMATIC	On Moved in, or when the tenancy start date passes (checked 08:05 daily), they leave Applicants and the same login opens the resident app.

F · Notice and the three check-out visits

INSPECTIONS

1	LIVING	Notice opens only on a contractual rent date once that date's rent is received. Step 1 asks why they are leaving; step 2 is the notice, naming the landlord company.
2	AUTOMATIC	Three visits booked with Kevin: **1 of 3** pre-check-out at 10:00 about a month before the end date; **2 of 3** follow-up at 10:00 two weeks later; **3 of 3** check-out and keys at 11:00 on the end date (next working day if a weekend or bank holiday).
3	NICOMGT™	Visits show in Inspections with the notice reference, in the Calendar and the Maintenance calendar. The exit answers feed Why tenants leave. Never agree a check-out time verbally: the tenant taps Rearrange, you move it here.

G · A new starter

NICONET › OFFICE

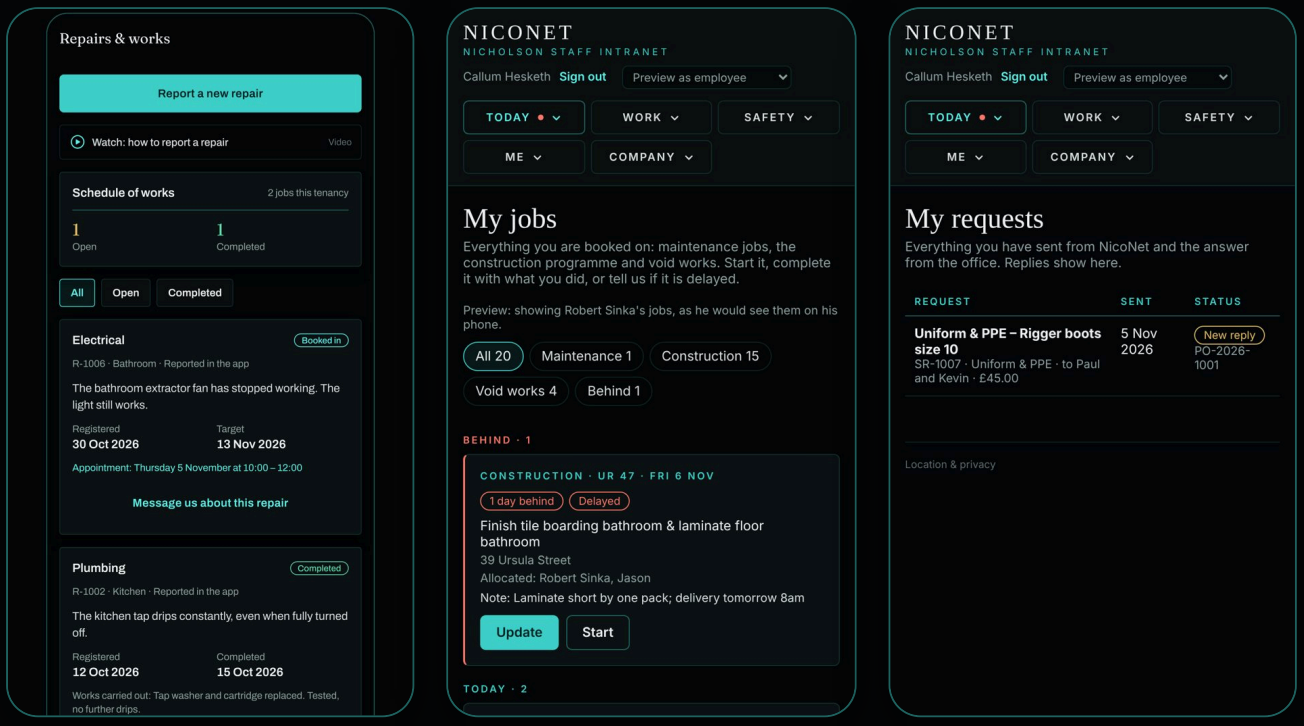

1	NICONET™	A manager adds the starter in Office › New starters before day one: name, sign-in email, first day, job title, employee or subcontractor, line manager.
2	AUTOMATIC	Their NicoNet sign-in is created. For employees, the week-one 1-2-1 with Paul and the line manager is booked for 09:00 at Nicholson HQ on the Monday after the first week (Tuesday after a bank holiday Monday).
3	NICONET™	Starter watches Welcome from Paul and the how-to film, signs every policy statement, and sees the 1-2-1 on My day.
4	NICOMGT™	The 1-2-1 sits in Staff requests for Paul and the line manager. Mark it Held with notes on what was agreed; not marked by 11:00 that day, it goes to Paul.

H · A building notice

NOTICE BOARD

1	NICOMGT™	Post the notice once to the building, with date, time and what to expect.
2	LIVING	Every current tenant in that building gets a push and sees it on the board; it is logged to each tenancy record and comes down the day after.

The same moment in all three apps

Left: the tenant's Repairs & works in Nicholson Living. Centre: the engineer's My jobs in NicoNet. Right: a staff member's My requests in NicoNet, where every NicoMGT answer lands.

STANDARDS

8 Service standards and escalations

Every clock below is enforced by the system. A missed clock is visible to the CEO without anyone reporting it.

ITEM	STANDARD	IF MISSED
Emergency repair	Made safe same day; complete in 2 days	Overdue at day 2; alarm to Kevin, Callum and Paul at day 3
Reactive repair	14 days	Overdue at day 14; alarm at day 21
Inconvenience repair	28 days	Overdue at day 28; alarm at day 42
Resident message to engineer	Answered by 17:00 the same working day	Emailed to Kevin (to Paul when Kevin is the engineer)
Tenant message to the office	Same working day	Shows oldest first on the Dashboard until answered
Sickness, absence, accident, vehicle defect, urgent	Picked up within 1 hour	Emailed to Paul
All other staff requests	Picked up within 24 hours	Emailed to Paul
Week-one 1-2-1	Marked Held by 11:00 on the day	Goes to Paul
Pet request	Decided by the 28-day reply date	Deadline counts down on the Dashboard
Inspection notice	At least 24 hours' written notice	Booking refused by the system
Rent	Received by 09:00 on the rent date	Arrears: message, banner, push, app restricted; days 3, 7, 14, then weekly
Time to pay	Maximum 3 days, one month at a time	Arrears message resumes the next working day if still unpaid
Clock-in	On site by 07:50, location checked	Flagged; manual clock-in needs Kevin's approval
Weekly fire inspections	Every block, every Monday, Done by 16:00	Escalated to Paul at 16:00, even if marked Seen
Spending	Approved by Paul with a PO before purchase	Unapproved spend is not reimbursed

MEASURED, NOT ARGUED

Maintenance closed per engineer (Team league), repair feedback, overdue counts, arrears days and exit reasons are all counted by the system. Management performance is reviewed against these numbers.

CONDUCT

9 Rules for managers

1 · Claude drafts, a manager sends

Nothing reaches a tenant or a member of staff without a person pressing Send. Claude also checks every contractor reply to a tenant before it is sent. You are accountable for every word that leaves under the Nicholson name.

2 · No side channels

No WhatsApp, personal texts or personal email with tenants or staff about work. If contact happens elsewhere, log it on the record in NicoMGT the same day.

3 · Protect personal details

Never give a tenant an engineer's phone number or an engineer a tenant's surname or phone number. The emergency line number is not shown to tenants; they tap to call.

4 · Service with Respect, both ways

Every tenant accepts the Service with Respect policy on sign-in. Hold them to it calmly, and hold yourself to it first.

5 · Nothing agreed verbally

Check-out times, rent dates, time to pay, consents and holidays are agreed in the apps so the decision is dated and on file. If you agree something by phone, record it immediately.

6 · Statutory notices stay lawful

Possession notices, rent increase notices and deposit prescribed information are served by the methods the law and the tenancy agreement allow. File a copy to the tenant's My documents so the record is complete.

7 · Reasonable adjustments

A tenant who cannot use a smartphone is not shut out (Equality Act 2010). Handle their matters by phone, letter or visit and log every contact in their Tenants file.

8 · Reviews are never filtered

Every tenant is invited to review on Trustpilot on the same schedule (30 days after move-in, then each anniversary), whatever their feedback. Never choose who is invited by score or sentiment.

9 · Confidential means confidential

Grievances, whistleblowing, health and pay are never discussed outside the person routed to deal with them.

10 · Leave it closed

An item is not finished when it is Seen. It is finished when the sender has an answer, the record is updated and, where money is involved, a PO or payment reference is on it.

REFERENCE

10 Quick answers

SITUATION	WHAT TO DO
A tenant emails office@ or phones	Answer them, log the contact on their record in Tenants, and ask them to use the app next time. Do not run the matter by email.
A staff member texts or WhatsApps you	Ask them to send it in NicoNet. Do not act on it until it is there, unless it is a safety emergency.
The sign-in code has not arrived	Check junk, wait two minutes, request one new code. Codes expire; use the latest.
A tenant says they have paid but shows in arrears	Check the bank. If received, press Payment received; the app unlocks at once. If not, reply with the amount outstanding.
A tenant asks for a week to pay	Three days is the maximum. Offer up to three days or pass to the debt collection team for a plan.
An engineer has not answered a resident	Reply as "Nicholson office" on the job to keep the resident informed, then chase the engineer in NicoNet.
A job was completed but the tenant says it is not fixed	It reopens automatically. Reallocate and rebook; the original completion stays on the register as rejected.
An operative bought materials without a PO	Decline the expense with the reason, or refer to Paul. Spend is approved before purchase, not after.
A check-out falls on a Saturday	It is already at 11:00 on the next working day. Tenancy end date and rent are unchanged.
A tenant asks to give notice on a non-rent date	Explain that notice can only be given on the contractual rent date once that date's rent is received. Do not serve it for them.
A request was answered but the sender cannot see it	They should open NicoNet → My requests. A badge shows unread answers.
You will be away	Tell Paul which items you own are open. Mark them Seen with a note so the cover manager has the context.
I need a tenant's phone number	People › Directory. Search the name or address and tap the number. Log the call on their record in Tenants.
A tenant says nobody turned up	Open the job in Maintenance: check the visit, the engineer and the conversation. Rebook the same day, reply in Messages, and find out why from the engineer.
An engineer is off sick with visits booked	Maintenance › filter by that engineer. Reallocate or move each visit; every tenant is told automatically.
Am I booked on anything I don't know about?	Calendar for the week, the Maintenance calendar on your phone, and Inspections filtered to you. Check-outs book themselves on notice.
A tenant wants a different check-out time	Ask them to tap Rearrange in the app, then move it in Inspections. Never agree it by phone.
The guide and the app disagree	The app is the system of record. Tell Paul the same day.

UPDATE · 7 NOVEMBER 2026

Polish with Claude

> Every message box in NicoMGT, NicoNet and Nicholson Living now has Polish with Claude, so tone never depends on who is typing or how their day is going.

Where it is

- **Messages** – Claude still drafts the reply as the conversation opens; Polish tidies anything you write yourself.
- **Maintenance** – the resident ↔ engineer chat, when you reply as “Nicholson office”.
- **Tenants › Message the tenant** – opens “Dear [first name]” and signs off “Nicholson Lettings”.
- **Staff requests** – replies and decisions shown in the staff member’s NicoNet.
- **Notice board, consent decisions, repair completion notes, inspections and the newsletter** – anything a resident will read.

How it works

- Use it on everything a tenant or member of staff will read. You remain responsible for the content: read it before you press Send.
- Engineers cannot skip the check: in NicoNet › My jobs the button reads **Check & send**. The first press has Claude check the reply and remove any phone number, email, surname or off-app payment talk; the engineer reads it and presses Send.

Polish keeps every fact, date, time, amount and commitment exactly as written and adds nothing new. It fixes spelling and grammar and takes out rudeness, sarcasm and shouting.

SIGN-OFF

11 Acknowledgement

I confirm that I have read the NicoMGT Management Guide in full, that I understand how NicoMGT, NicoNet and Nicholson Living work together, and that I will manage every tenant and staff matter through them to the standards in Parts 8 and 9.

I understand that all spending requires Paul Nicholson's approval and a purchase order before purchase; that tenants and staff are communicated with through the apps and not through personal channels; that nothing generated by Claude is sent without my review; and that every service standard in this guide is measured by the system.
