Your day, *step by step.*

This is everything you need to use NicoNet from day one. Follow the steps in order. Everything you send goes to the right manager, and the answer comes back to you in **My requests**. If you get stuck, the answer is in the last sections.

07:50
Clock in on site by this time

08:00–16:00
Your working day, Monday to Friday

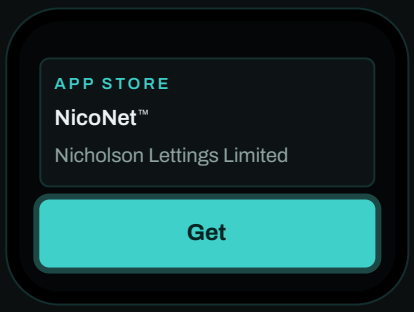

On site
Clock in and out only at HQ or your booked site

DO ONCE Day one: set up

1 Download the app

Open the App Store or Google Play and search **NicoNet**. Tap Get or Install.

It is not the same as Nicholson Living, the residents' app.

2 Sign in with your email

Type your work email and tap **Email me a sign-in code**. Open your email and type the code into the app.

No password. No code? Check your junk folder.

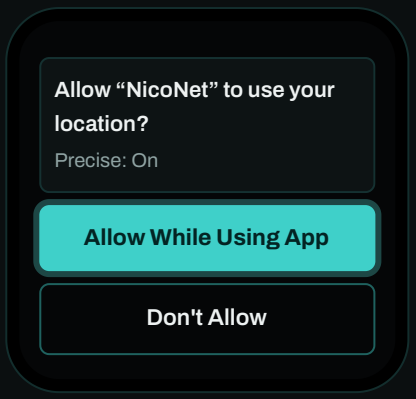

3

Allow location and notifications

When your phone asks, tap **Allow While Using App** and keep **Precise Location** on. Then allow notifications.

Without location you cannot clock in. Without notifications you miss new jobs.

4

Watch Paul's welcome

On My day, tap **Welcome from Paul**. Watch the welcome and the one-minute guide.

5

Sign everything

Open the menu, go to **Policies & sign-off** and sign every statement. Then sign the **Culture Code** and the **Staff handbook** parts.

All must be signed before your first shift.

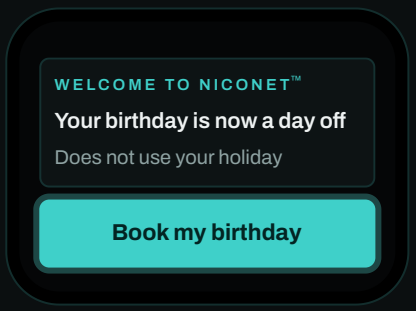

6

Book your birthday off

The first time you sign in, NicoNet tells you that you get your **birthday off, paid**, without using any of your holiday. Tap **Book my birthday**, or book it later in **Holidays** as a birthday day off.

Birthday on a weekend, bank holiday or blackout day? Pick another working day in the same month.

7

Check your week-one 1-2-1

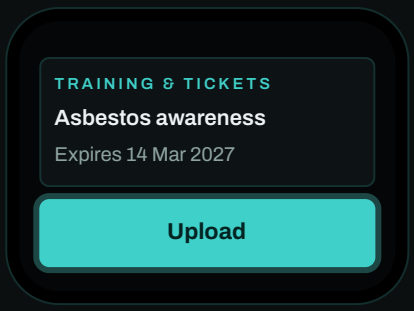

On **My day** you will see your **week-one 1-2-1 with Paul**: 9am at Nicholson HQ on the Monday after your first week, with Paul and your line manager.

It is booked for you. Nothing to arrange, nothing to prepare. Bring your questions.

8 Fill in your records

Upload your **Right to work** document, your **Training & tickets** with expiry dates, and your **Vehicle declaration** if you drive for work.

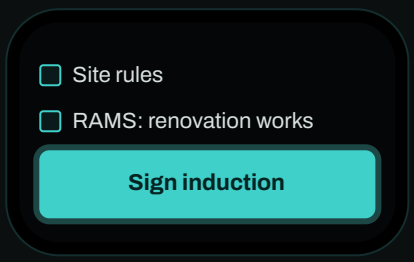

EVERY DAY

When you arrive

1 Sign the site induction (new sites only)

First time at a site? Open **Site induction & RAMS**, read each document, tick it and tap **Sign induction**.

No signature, no clock-in. The app will not let you clock in until you do.

2 Clock in by 07:50

Be at Nicholson HQ or the site you are booked on. Tap **Clock in**. You see **On site** in green.

After 07:50 is late and the minutes are recorded. Running late? Before 07:50, Messages › Running late. It goes to Kevin and Paul.

3 Check My jobs

Tap **My jobs**. You see each job's time, address, job number, what is wrong and how to get in.

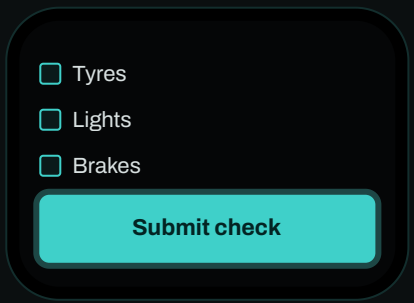

Only do jobs that are on My jobs. You see the resident's first name, not their number.

4 Driving? Check the van

Tap **Daily van check**, tick all ten checks and tap **Submit check**.

If anything fails, the van is off the road. Do not drive it. Tell Kevin.

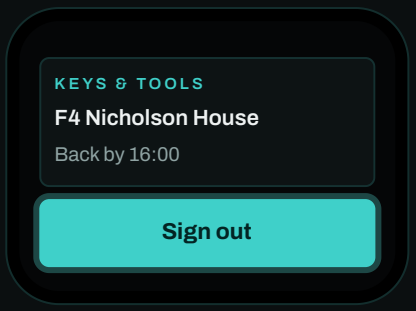

5

Need keys? Sign them out

Tap **Keys & tools**, pick the key and the time it will be back.

Kevin is alerted if a key is not back on time.

EVERY JOB

At each job

1

Alone in an empty property? Check in

Tap **Lone working**, pick the property and your finish time, then tap **Check in**.

If you do not check out 30 minutes after your finish time, Kevin calls you.

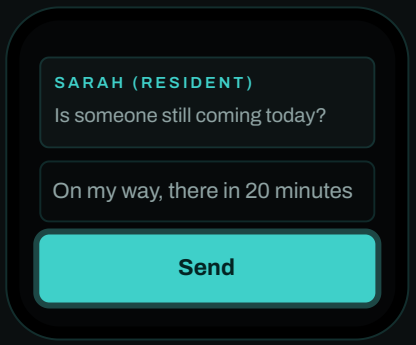

2

Message the resident if you need to

On the job in My jobs, tap **Message [first name]**: “On my way”, “Please leave the bathroom clear”, “Back Thursday with the part”. When a resident writes to you, you get an email. Reply by **17:00 the same working day**.

First names only. Never give your number or take theirs. The office reads every message, and Kevin is told if you have not replied by 17:00.

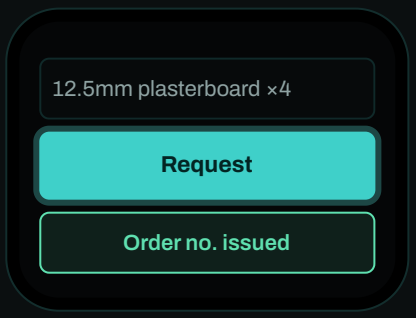

3

Need materials? Order first

Tap **Materials & orders**, add what you need for the job and send it. Paul approves every order, whatever it costs. The **order number** appears in My requests. Quote it at the counter.

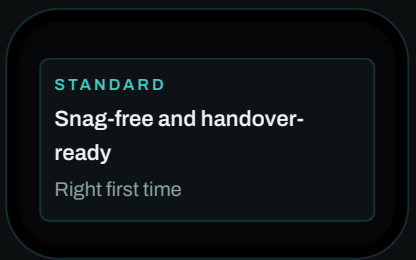

No order number, no purchase, even for £10. Photograph the receipt the same day.

4

Do the job properly

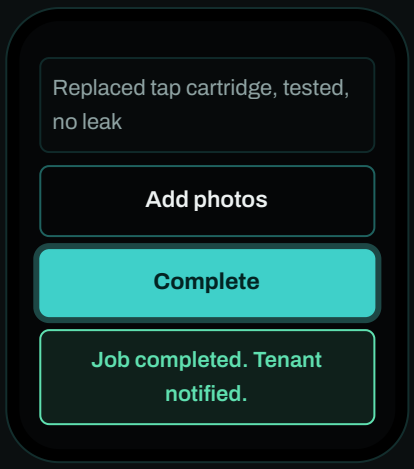

Finish it so it is clean, safe and snag-free. If the resident will not let you in, do not force entry; leave and report it.

5 Write up and complete

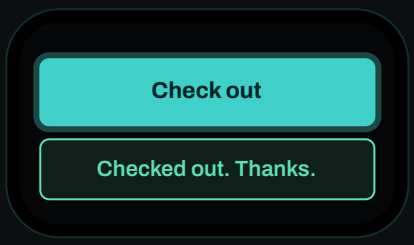

Open the job. Write **what was wrong, what you found and what you did**. Add photos. Tap **Complete**.

The resident is told what you did and asked if they are happy. If not, the job comes back to you.

6 Check out of lone working

Tap **Check out** when you leave the property.

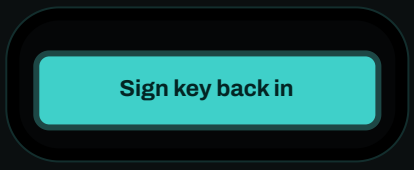

EVERY DAY

Before you go home

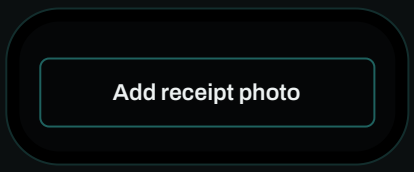

1 Keys back in

Return every key and tap **Sign in** on it in Keys & tools.

2 Receipts photographed

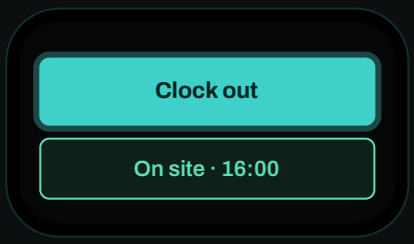

Photograph any receipt against its order in Materials & orders.

3 Clock out on site

Before you leave the site, tap **Clock out**. Not from the van and not from home.

Clocking out away from site fails and is logged.

EVERY REQUEST

Where your answer comes back

1

Send it from the right page

Sickness, Holidays, Materials, Uniform & PPE, Accident, Return to work, 1-2-1, or **Messages** for anything else. You see who it has gone to and a reference like **SR-1042**.

No texts, no WhatsApps, no word in passing. If it is not in NicoNet, it did not happen.

2

Check Today › My requests

Waiting = not picked up yet. **Seen** = a manager has it. Then **Approved**, **Declined** with the reason, or **Done**. A badge shows when you have an answer.

Sickness, lateness and accidents are answered within 1 hour; everything else within 24 hours. If not, it goes to Paul.

FIND IT FAST

I want to...

Book holiday	Menu › **Holidays** › Holiday (from the 20 days) › pick your dates › Send request. Paul or Callum approves.
Book my birthday off	Menu › **Holidays** › Birthday day off › pick the date › Send request. It never uses your holiday.
See my week-one 1-2-1	**My day**, or Menu › **New starter induction**. 9am at HQ on the Monday after your first week.
Ask a question as a new starter	Message your **line manager** in NicoNet, however small the question.
Call in sick	By 07:30 on your first day off: Menu › **Sickness** › Report sickness. Off more than 7 days? Upload a fit note.
Come back after being off	Menu › **Return to work** › fill in the form on your first day back › Send to my manager.
Say I'm running late	Before 07:50: **Messages** › Running late. It goes to Kevin and Paul.
See the answer to a request	Today › **My requests**. Reply or withdraw it there.
Message a resident about a job	**My jobs** › open the job › Message [first name]. Reply by 17:00 the same working day.
Order uniform or PPE	Menu › **Uniform & PPE** › add items and sizes › Send request. Paul approves.
Report an accident or near miss	Menu › **Accident & near miss** › fill it in the same day › Send report. It goes to Kevin and Paul.
Log a fire alarm test	Menu › **Compliance & audits** › Weekly fire alarm tests › Log test. A fault goes to Kevin as urgent.
Fill in a void form	Menu › **Void forms** › open the form for the stage › tick, photograph, sign.
See my payslip	Menu › **Payslips & P60s**. Subcontractors: CIS statements.
Talk privately to a manager	Menu › **Request a 1-2-1**. The date comes back in My requests within two working days.

Refer a friend to work here	Menu › **Refer a friend**. If they join and complete probation, you receive a refer-a-friend bonus.
Give feedback or nominate someone	Menu › **Feedback & Employee of the Month**. Feedback is anonymous.
Go to a training day or event	Menu › **Staff events** › I'm going.
Read the rules	Menu › **Staff handbook**, **Culture Code** or **Health & safety**.

IF YOU SEE THIS

Warnings, and what to do

Every warning is recorded and the office sees it. Fix it straight away.

You are not at a permitted site

You are too far from HQ or your booked site. Go to the right site and try again.

Office sees: the failed attempt, the time and how far away you were.

Flagged late

You clocked in after 07:50. Next time, message Kevin under Running late before 07:50.

Office sees: your late minutes. Three lates in four weeks means a conversation with Kevin.

Reading only accurate to ±…m

Weak signal. Turn on Precise Location, step outside or near a window, try again.

Still failing on site? Tap Ask for a manual clock-in.

Location is switched off

iPhone: Settings › Privacy & Security › Location Services › set the app to While Using, Precise on.

Clock-in here is blocked

You have not signed this site's induction. Open Site induction & RAMS and sign it.

Past your expected finish

Your lone working time has run out. Check out or extend now.

After 30 minutes Kevin is alerted and calls you.

Add what was done before completing the job

Write what was wrong, what you found and what you did, then tap Complete.

Job rejected by the resident

The job is back on your list. Go back and put it right.

Office sees: the rejection, which counts at your appraisal.

Off the road

The van failed its check. Do not drive it. Tell Kevin.

Reply overdue

A resident is waiting for your reply on a job. Open it in My jobs and reply now.

Office sees: Kevin is emailed at 17:00 if you have not answered.

Declined

A request was refused. Read the reason in My requests and reply there if you need to.

Expires soon

A ticket or card is about to run out. Renew it and upload the new one.

SAFETY FIRST

If someone is hurt

Call 999 first. Then phone Kevin Sharp. Then report it in the app the same day.

Do not move anything unless it is needed to make it safe. Suspect asbestos? Stop, keep others away, report it. You can always stop work you think is unsafe.

NEVER FORGET

Golden rules

1. **If it is not in the app, it did not happen.** Every job, order, key and absence goes through it.
2. **Clock in and out on site,** by 07:50 and at 16:00.
3. **Write up every job** before you tap Complete. Never complete a job that is not finished.
4. **No order number, no purchase.** Paul approves every purchase, even £10. Photograph every receipt the same day.
5. **Talk to residents only in the app.** Message them on the job; never swap phone numbers.
6. **Keys back the same day.** Never copy or share keys or codes.
7. **Never take money from a resident,** never discuss rents, never smoke or vape in a home.
8. **Instructions only come from Paul or Kevin,** unless Paul says otherwise in writing.

STUCK?

Who to ask

Your line manager

Your first port of call for anything, however small, especially in your first weeks

Kevin Sharp

Jobs, sites, safety, keys, vans, sickness, running late

Callum Hesketh

Sign-in problems, your email, pay, tickets, right to work

Paul Nicholson

Every purchase (materials, PPE, expenses), holiday, anything else

UPDATE · 7 NOVEMBER 2026

Polish with Claude

> Under every message box there is now Polish with Claude. One tap makes your message clear and polite – in your words, with every fact kept.

Where it is

- Messaging a resident about a job? Press **Check & send**, read what Claude has tidied, then press **Send**.
- Messages to the office, 1-2-1 notes and request replies: tap **Polish with Claude** before you send.

How it works

- Tap **Undo** to put your own words back. Nothing is sent until you press Send.

Polish keeps every fact, date, time, amount and commitment exactly as written and adds nothing new. It fixes spelling and grammar and takes out rudeness, sarcasm and shouting.

Nicholson Living™, NicoNet™ and NicoMGT™ are trade marks of PJN Holdings Limited.

UPDATE · 14 NOVEMBER 2026 · MY JOBS

Closing a maintenance job

> Every maintenance job is closed the same way: clock on, before photo, clock off, after photo, complete. A job cannot be closed until every step is done – NicoNet will not let it.

Where

- Open **My jobs** (today's jobs are listed first). Agree the appointment on the card – press **Agree** on a time the tenant suggested, or offer up to three. The job, its repair report and photos, and the agreed time are all on the card, with a **Site visit** box of five steps; each opens when the one before it is done.
- Tenant messages on the job are answered in NicoNet the same working day.

The five steps

- **1. Start job.** Press it when you arrive and are about to start. The clock starts, the appointment is marked attended and the resident is told you have arrived.
- **2. Before photo.** The camera opens. Photograph the fault before you touch anything. Take as many as you need.
- **3. Stop clock.** Press it when the work is finished. It will not stop until there is a before photo.
- **4. After photo.** Photograph the finished repair from the same angle as the before.
- **5. Job report.** All four are required: **(1)** the issue and your diagnosis; **(2)** what you did to resolve the repair (use **Polish with Claude** – the resident reads 1 and 2); **(3)** materials used ("None" if none); **(4)** tick to confirm **the repair worked when tested**. Then **Complete job**.

If you can't finish on this visit

- Stop the clock, press **Couldn't finish on this visit** and choose **Delayed** or **Not completed** with the reason (part ordered, no access to the room). When you go back, press Start job again: each visit has its own clock and photos.

After you complete it

- The resident is told in Nicholson Living what you found, what you did and that it was tested, by whom, the time on site, with your before and after photos, and is asked to rate the repair.
- Management reviews every completed job. The card then shows **Signed off** – or **Sent back**: the job comes back on your My jobs with what needs putting right, and you get an alert.

Rules

- Start the job only when you are at the property. Your position is recorded when you start and stop, and the times are checked against the appointment.
- Photos are taken there and then with the camera. Once saved they cannot be changed or deleted.

Office logins see the same five steps in NicoNet. NicoMGT cannot close a maintenance job without them either.

Voids team: Move-In Prep and hand-over

> Your void work arrives in NicoNet as an online Move-In Prep from your manager. You put right every line, follow N3 Voids every time, and finish by certifying the home ready for the cleaner. That certificate is yours.

Receiving the work

- An alert and push tell you a Move-In Prep has been issued to you. Open **Work › Move-in prep**. Each prep shows the address, the date it must be ready, the move-in date and any promises made to the incoming tenant.
- Watch the manager's **walk-through video** first – it points at every issue so there is no doubt. Then read each **line**: room, what is wrong, the trade, and a clip or photo of the issue.
- Anything beyond normal void work (new floors, a kitchen, joinery) is raised by the manager as a separate extra-works job for the right trade, finished at least 24 hours before move-in. It is not on your prep.

Doing the work

- Put each line right and tick it with an **after photo** – the line cannot be ticked without one. Lines the manager sends back reappear with what is wrong.
- Follow **N3 Voids** (SOP › Voids) every time, in full. These are our standard operating procedures: non-negotiable, whether or not they are on the prep.
- **Found a defect that is not on the prep and you can't fix it?** Press **Report a defect now** on the prep. The office is alerted immediately so it can be put right without affecting the move-in.

Hand-over: you certify it

- Confirm each statement: every line done with an after photo; every issue in the video put right; N3 Voids complete; **appliances switched on and working, hot water running and every socket tested**; materials and tools removed with a brush and wipe through; keys back at the office.
- Type your full name and press **I verify – hand over to the cleaner**. You are certifying the work is complete – checked and triple-checked. Once pressed, it is on you.
- The cleaner is instructed automatically and management is alerted. Management audits your before and after photos and passes it, or sends lines back to you with the reason.

Don't press hand-over until you would be happy for the tenant to walk in. The cleaner should never have to call you back.

Cleaning: the move-in clean

> You are last in the home. How you leave it is how the tenant sees it, and it forms their impression of us, the team and the brand. Every clean follows N3 Cleaning and the Cleaning Matrix, every time.

When you are instructed

- When the voids team certify their work complete, you get an alert and the clean appears in **My jobs** as **V5** on that void. They will not need access again.

The clean, step by step

- **1. Start job** when you arrive (clock on). **2. Before photos** of every room as you find it. **3.** Clean to **N3 Cleaning** (SOP › Cleaning) and the Cleaning Matrix. **4. Stop clock. 5. After photos** of every room from the same angles.
- **6. Cleaning Matrix:** mark every line **Done** or **N/A** – kitchen, bathroom, bedrooms and furniture, throughout, finish, and the **communal areas**. If you follow the Matrix, every element is covered: it is built from every complaint we have had.
- **7.** Write what you did and press **Finish clean**. The Matrix and your photos go to management in NicoMGT, and the manager is told the quality check is due.

Communal areas – first impressions start at the main door

- Every move-in clean includes the communal entrance, stairs and landings: clean, organised and smelling fresh. Fresh water every time – a dirty-mop smell or dirty communal floors will put a tenant off however good the home looks.

After you finish

- Management reviews your photos and Matrix, then the manager does the Move-In Quality Check. Anything that fails comes back to your My jobs with the reason.
- Can’t clean something to standard? Tell the office the same day so it is put right before move-in.

No Matrix, no release: the clean cannot be finished without the clock times, before and after photos and every Matrix line.

Extra works and void rules

> Works beyond normal void work are raised early – at the check-out inspections wherever possible – so they are done during the outgoing tenant's notice period and never left to the last day.

Works beyond void work

- New floors, a kitchen, joinery – anything beyond normal void work. The manager (or whoever has the check-out inspections V1, V2, the final check-out V3 or the Move-In Prep V4) raises it in the **Works beyond void work** box: what needs doing, the detail, the trade, the **responsible person** and the due date.
- It becomes an extra-works job (W1, W2…) straight into that person's My jobs, with an alert to them and to management. Due date: at least **24 hours before move-in** – NicoNet will not accept a later date.
- Extra-works jobs are closed like maintenance: Start job, before photos, Stop clock, after photos, what you did, Complete job. Management signs them off.

Rules

- A Move-In Prep cannot be submitted, and V1, V2 and V4 cannot be completed, until works beyond void work are raised or **No works beyond void work** is confirmed.
- V4 cannot be completed while any extra works are unallocated, have no due date, or are due later than 24 hours before move-in.
- Any extra works still open on their due date are alerted to management at 07:25 every morning.
- The Move-In Quality Check (V6) cannot be started until the clean and every extra-works job are complete.

There is a month's notice period and then the void itself to put things right: nothing should be left for the tenant to find.

Move-In Quality Check

> The manager's final check before a home is let, done in NicoNet on the V6 card. It replaces the paper Move In Quality Check and ends with a certificate that the home is perfect and ready for occupation.

When

- It opens once the clean (V5) and every extra-works job are complete. You get an alert when the cleaner finishes.

The check

- Walk the whole home. Twenty-nine items in seven areas: clean and presentation; decoration and fabric; windows, doors and keys; services and safety; furniture and furnishings; communal and external; the incoming tenant.
- Answer every item **Pass**, **Caveat**, **Fail** or **N/A**. Anything other than Pass needs a note.
- **Caveats** are things that are acceptable but not perfect, or could not be checked – for example "the kitchen worktop is not in perfect condition and may be noticed by the tenant" or "no gas at the property, so the heating could not be tested". Record them in the caveats box (**Fill from the items marked Caveat** does it for you).

Certify

- Tick the certificate: you personally inspected the home today, it is in perfect condition, clean, safe and ready for occupation, and every Nicholson standard is met, subject only to the caveats recorded. Press **Certify ready for occupation**.
- V6 is completed, NicoMGT is told it is ready, and the caveats appear on the V7 Move-In Meeting card to go through with the tenant.

If anything fails

- A home with a failed item cannot be certified. Press **Submit as not ready**: NicoMGT is alerted, the item is put right, and you check again.

Your name, the time and your phone's position are recorded with the certificate. V6 can only be completed by certifying this check.
