NICONET · IPHONE, ANDROID AND WEB

Everything Nicholson, *in one place.*

NicoNet, our staff intranet, is how you clock in, see your jobs, book holiday, report sickness, order PPE, sign site inductions, and find your payslips, the handbook and company news. Everything between you and the Company goes through it: instructions, jobs, requests, messages, documents and notices. Every request you send lands with the right manager in NicoMGT, the management console, and their answer comes back to you in NicoNet.

- Clock in by 07:50
- Working day 08:00 to 16:00
- Location checked only when you press the button
- Every request answered in My requests
- Message residents about their repair in the app
- Separate from Nicholson Living, the tenant app

OUR APPROACH

Why we built it

> Our residents now see every repair from report to completion. We owe the team the same clarity about their own work.

Until now, jobs lived on spreadsheets that only management could see, holiday was agreed in passing, and paperwork was spread across WhatsApp, email and paper. That made it hard for anyone to see what was waiting for them or to get credit for what they had done.

NicoNet puts your day in your hands. Your jobs arrive from the shared Maintenance calendar. When you close a job, the resident is told what you did and asked for feedback, so good work is seen. Your hours, holiday, sickness, tickets and sign-offs are recorded accurately and fairly, in one place you can check yourself.

See your own work

Today's jobs, what is overdue and what you have closed.

Fair records

Clocking, holiday and absence recorded the same way for everyone.

Safe on site

Inductions, RAMS, lone working and accident reporting on your phone.

One place for admin

Payslips, PPE, 1-2-1s and the handbook, without chasing anyone.

FIRST DAY Getting started

1. **Download NicoNet™**
   From the App Store or Google Play, published by Nicholson Lettings Limited. This is a separate app from Nicholson Living, the tenant app. You can also use the web version; ask the office for the link.

2. **Enter your work email**
   Use the email address the office has registered for you, then tap Email me a sign-in code.

3. **Type in the code from your email**
   No password to remember. Check junk if the code has not arrived within a few minutes.

4. **Watch Welcome from Paul**
   Paul's message to the team, then the one-minute guide to the app.

5. **Sign your statements**
   Open Policies & sign-off and sign every statement. All must be signed before your first shift. Then sign the site induction for any site you are booked on.

6. **Allow location and notifications**
   Location is needed to clock in on site. Notifications tell you about new jobs, approvals and announcements.

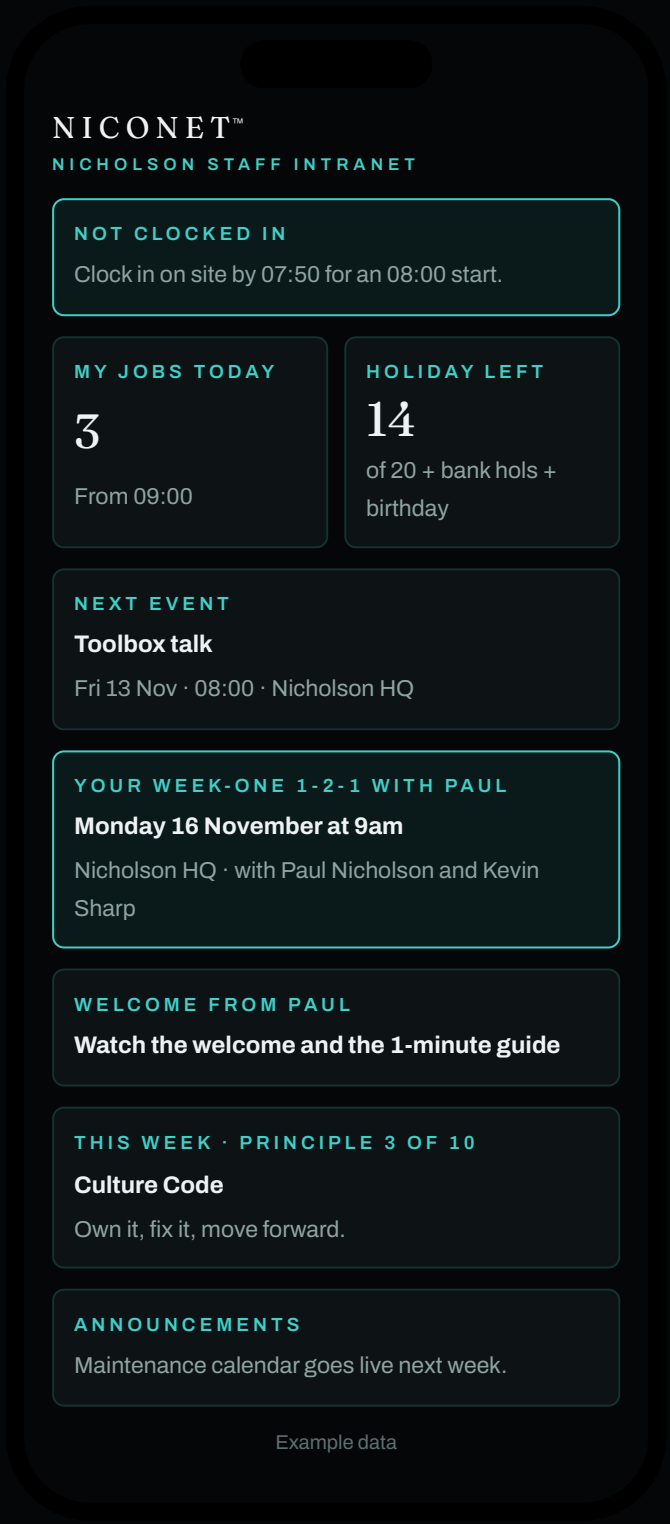

7. **Read your birthday message**
   The first time you sign in, NicoNet tells you that you get your birthday off, paid, without using any of your holiday entitlement. Tap **Book my birthday** to book it straight away, or **Got it, thanks** to book it later in Holidays.

8. **Check your week-one 1-2-1 with Paul**
   New starters: it is already booked for you, at 9am at Nicholson HQ on the Monday after your first week, with Paul Nicholson and your line manager. It shows on My day and on Company › New starter induction. You do not need to arrange it.

Your line manager supports you throughout. Message them through NicoNet whenever you need to, with any question, however small. Your line manager is Kevin Sharp unless the office tells you otherwise.

HOME SCREEN

My day

Clock-in card

Shows whether you are clocked in, and flags you if you clock in after 07:50.

My jobs today

Your bookings for the day from the shared Maintenance calendar. Tap to open them.

Holiday left

Your remaining allowance for the year, net of approved and pending requests. Your birthday day off is on top and never comes out of it. Employees only.

Next event

Toolbox talks, training and socials. Tap to say you are going.

Week-one 1-2-1 with Paul

New starters only. Booked automatically for 9am at Nicholson HQ on the Monday after your first week, with Paul and your line manager. It stays on My day until it has been held.

Culture Code

One of our ten principles each week. Read the full code any time under Company.

My requests

Under Today. Everything you have sent, who has it, the decision and every reply. A badge shows when the office has answered.

Announcements

Company news from management. Check daily.

Menu

Everything else sits in the menu, grouped Work, Safety, My records and Company. What you see depends on whether you are employed or a subcontractor.

READ THIS FIRST

What the system records

Every action in NicoNet is time-stamped against your name and kept on your record. The office sees the same information you do, plus every flag and failed attempt. If something is not recorded in NicoNet, as far as the Company is concerned it did not happen.

Attendance

Every clock-in and clock-out, with the time, the site and the location result. Lateness is recorded in minutes. Every attempt away from site is logged and shown to the office, even if you then clock in successfully.

Work

Every job you open and close, your write-up, your photos and the resident's verdict. Recalls and rejected jobs stay on the job's history.

Company property

Who signed out which key and when it came back, every materials order and receipt, and every van check.

Safety and compliance

Inductions, RAMS, tickets, PPE issued, lone working check-ins, and accident and near-miss reports.

Absence

Holiday requests and approvals, sickness reports with the time you reported, fit notes and return-to-work forms.

Requests and messages

Every request you send, who it went to, when it was seen, the decision and every reply. Every message between you and a resident about a repair, with the time you answered.

Sign-offs

Every statement, policy, handbook part and Culture Code signature, with the date, time and version.

It all feeds your appraisal. Your January appraisal scores jobs completed against the 5-a-day target, right-first-time work and rejected jobs, safety records, job records and photos, materials orders, keys and van checks, attendance and punctuality, and resident feedback. All of it comes from what NicoNet has recorded through the year.

EVERY WORKING DAY

Clocking in and out

07:50	08:00	Day	16:00	Mon–Fri
Latest clock-in	**Start**	**Jobs**	**Finish**	**No overtime**
After 07:50 is late, recorded in minutes.	Ready to work at HQ or your booked site.	Work through My jobs.	Clock out on site when you leave.	Extra time only if agreed in advance with Paul or Kevin.

Clock in

1. Arrive at Nicholson HQ, 105 Water Street, or the site you are booked on today.
2. Open NicoNet and tap **Clock in**.
3. Allow location when your phone asks. One reading is taken.
4. You see **On site at [site name]**. You are clocked in.

Clock out

1. Before you leave the site, tap **Clock out**.
2. Allow location. You see **On site** and the time.
3. You can only clock out on site. Clocking out from the van or at home fails and is logged.

Running late

1. Before 07:50, open **Messages**.
2. Choose **Running late** and send it with your expected arrival time. It goes to Kevin Sharp and Paul Nicholson as urgent.
3. Clock in as soon as you arrive. The late minutes are still recorded.

Ask for a manual clock-in

1. Only when you are on site and the clock-in will not work.
2. Tap **Ask for a manual clock-in**.
3. Say where you are and why it will not work.
4. It goes to Kevin Sharp as **Manual · awaiting approval** and shows in My requests. Kevin checks it against the booking before approving.

Your location is read only at the moment you press Clock in or Clock out. There is no tracking during the day, between sites, on breaks or outside working hours, and readings are deleted after 12 months. Location is used for attendance, pay and site safety only, as the Location & privacy notice sets out. Nobody has to use their own phone: if you prefer not to, sign in and out with your site manager and it is recorded as a manual clock-in.

Subcontractors see **Site sign-in** instead of Clock in. It works the same way and is the site safety and fire register, not a timesheet. Sign in when you arrive at a site and out when you leave.

KNOW THEM

Warnings and what happens next

These are the messages you can see in NicoNet. Each one is recorded. Read what it means, do what it says, and know what the office sees.

WARNING	WHAT IT MEANS	WHAT TO DO	WHAT THE OFFICE SEES
CLOCKING IN AND OUT			
After 07:50, flagged late	You clocked in after 07:50.	Message Kevin under Running late before 07:50 next time.	Your late minutes. Three lates in any four weeks lead to an informal conversation with Kevin Sharp. Further lateness in the following three months is dealt with under the disciplinary procedure.
You are not at a permitted site	Your phone places you away from HQ and your booked site, for example “You are 6.2km from Nicholson HQ”.	Go to the site you are booked on and try again.	The failed attempt, its time and the distance from site, under Attempts not on site.
Reading only accurate to ±…m	Your phone could not fix your position precisely enough.	Turn on Precise Location, step outside or near a window, and try again.	The attempt and its accuracy.
Location is switched off	The app is not allowed to read your location.	iPhone: Settings, Privacy & Security, Location Services, set the app to While Using with Precise Location on. Android: Settings, Location, App permissions.	No location was shared.
Your phone took too long to find you	No signal fix.	Step outside or near a window and try again.	The attempt.
Recorded · site pin not set	You clocked in at a site that has no boundary set yet.	Nothing. You are clocked in.	The clock-in is flagged for the office to check against your booking.

WARNING	WHAT IT MEANS	WHAT TO DO	WHAT THE OFFICE SEES
Manual · awaiting approval	You asked for a manual clock-in.	Wait for approval. Do not ask twice.	Your reason, checked against your booking and the site before it is approved.
SITE SAFETY			
Clock-in here is blocked until you do	You have not signed the induction and RAMS for this site.	Open Site induction & RAMS, read each document, tick and sign. You can then clock in.	That you tried to start without an induction.
Past your expected finish	Your lone working check-in has run past the finish time you set.	Check out, or extend your finish time.	30 minutes after your finish time, Kevin Sharp is alerted and will call you.
Expires soon	A ticket, card or insurance in Training & tickets is near its expiry date.	Renew it and upload the new one before it expires.	The expiry date. You may not be booked on work that needs an expired ticket.
x of y signed	You have statements in Policies & sign-off still to sign.	Read and sign them. All must be signed before your first shift and whenever you are asked to sign again.	What you have and have not signed.
JOBS, KEYS AND VEHICLES			
Job past target	A job has run well past its priority target.	Finish it, or tell Kevin today what is stopping you.	An alarm at 3 days for Emergency, 21 days for Reactive and 42 days for Inconvenience, emailed to Kevin, Callum and Paul.
Add what was done before completing the job	You tried to close a job without a write-up.	Write what the issue was, what you found and what you did.	Nothing until you write it up.
Rejected by resident	The resident was not happy with the completed job.	The job is back on your list with its history. Put it right.	The rejection, kept on the job's history and counted at appraisal.
Key not back	A key you signed out has passed its due time.	Return it and sign it back in.	Kevin Sharp is alerted.

WARNING	WHAT IT MEANS	WHAT TO DO	WHAT THE OFFICE SEES
Off the road	A van has failed its daily check.	Do not drive it. Tell Kevin.	The failed items and who found them.
Fails. Kevin alerted.	A void form was signed with failed items.	Put the failed items right. The property cannot be released for letting until every form passes.	Kevin Sharp is alerted to the failed items.
REQUESTS AND RESIDENT MESSAGES			
Waiting	Your request has been sent but nobody has picked it up yet.	Nothing. Do not send it twice. Watch My requests.	The request and its answer-by time. If it is not picked up in time it goes to Paul.
Declined	The request was refused, with the reason.	Read the reason in My requests. Reply there if you need to explain.	The decision, who made it and the reason.
Reply overdue	A resident messaged you about a job and you have not answered by 17:00 that working day.	Open the job in My jobs and reply now.	Kevin Sharp is emailed (Paul if the job is Kevin's). Late replies are counted at appraisal.
This repair is closed	You tried to message a resident about a completed job.	Message the office in Messages instead.	Nothing; the conversation is read-only once the job is complete.
ABSENCE AND RECORDS			
Return-to-work form due	You are back from an absence.	Complete the form on your first day back and send it to your manager to countersign.	Your absence record and absence score.
Renew by…	Your vehicle declaration is due for renewal.	Sign a new declaration with your current licence details.	Your declaration and renewal date.
Awaiting check by Callum Hesketh	Your right to work documents have been submitted.	Nothing. Callum will confirm once checked.	Your documents, for checking.

We do not fine anyone. Lateness, lost keys, van misuse and similar breaches are dealt with as conduct matters under Part B7 of the handbook, never by deductions from pay.

HOW WE ANSWER YOU

Requests and messages

Every form you send in NicoNet, and every message to the office, becomes a request with a reference such as SR-1042. It goes straight to the manager who deals with it in NicoMGT, the management console. They see it, decide it and reply there, and the answer comes back to you in **Today › My requests**. Nothing goes by text, WhatsApp or a word in passing.

1 **Send it from the right page**

Use the page for the job: Sickness, Holidays, Materials & orders, Uniform & PPE, Accident & near miss, Return to work, Request a 1-2-1, or Messages for anything else. You see who it has gone to and its reference.

2 **Track it in My requests**

Waiting means not picked up yet. **Seen – being dealt with** means a manager has it. Then **Approved**, **Declined** (always with the reason) or **Done**.

3 **Read the answer and reply**

The decision and every reply are on the request. Need to add something? Write it there and it goes back to the same manager.

4 **Changed your mind?**

Tap **Withdraw** on a request that has not yet been decided.

YOU SEND	IT GOES TO	ANSWERED WITHIN
Sickness, running late, can't attend	Kevin Sharp and Paul Nicholson	1 hour
Accident, near miss, unsafe van, fire alarm fault	Kevin Sharp and Paul Nicholson (fire alarm faults: Kevin)	1 hour
Materials, receipts and expenses	Paul Nicholson, who approves every purchase of any amount	24 hours
Uniform & PPE	Paul Nicholson to approve; Kevin Sharp sees it	24 hours
Subcontractor invoices	Paul Nicholson to approve; Callum Hesketh processes	24 hours
Holiday, family leave, time off	Paul Nicholson and Callum Hesketh	24 hours

YOU SEND	IT GOES TO	ANSWERED WITHIN
Return to work, 1-2-1s, appraisals	Kevin Sharp and Paul Nicholson (a 1-2-1 with Paul: Paul only)	24 hours
Jobs, sites, keys, void forms, manual clock-in, compliance	Kevin Sharp	24 hours
Pay, payslips, CIS, paperwork, tickets, right to work	Callum Hesketh	24 hours
Refer a friend	Paul Nicholson, who makes every hiring decision	24 hours
Anything else	Callum Hesketh and Paul Nicholson	24 hours
Formal grievance or whistleblowing	Paul Nicholson only, and nobody else can see it. A grievance about Paul goes to Kevin Sharp only.	24 hours

Nothing is bought without Paul's approval, whatever it costs, even £10. Request materials, PPE or an expense in NicoNet. When Paul approves, the order number appears on the request in My requests. Quote it at the counter and photograph the receipt the same day.

If nobody picks it up in time, it goes to Paul automatically: after 1 hour for sickness, absence, accidents and unsafe vans (or anything you mark urgent), after 24 hours for everything else. Records that need no decision, such as signed policies, tickets, key logs and passed checks, are simply filed on your record.

MAINTENANCE

My jobs

Jobs are booked on the shared Maintenance calendar and appear in My jobs automatically, showing the time, property, job number, repair description, the resident's first name and the access arrangements. Residents' phone numbers are not shown: you message them in the app instead. Do not start work that is not on My jobs.

1. **Check the access**
   Management keys or resident at home. If you need keys, sign them out in Keys & tools first.

2. **Working alone in an empty property?**
   Check in under Lone working and set your expected finish time.

3. **Do the job**
   Finish it to a snag-free, handover-ready standard. Need materials? Raise an order first.

4 **Write up the works carried out**
What the issue was, what you found and what you did. Add photos with Add photos where you can. You cannot complete a job without a write-up.

5 **Tap Complete**
You see
Job completed. Tenant notified.
The resident is told in Nicholson Living what was done and by whom, and asked for feedback.

PRIORITY	TARGET	ALARM
Emergency	2 days	3 days
Reactive	14 days	21 days
Inconvenience	28 days	42 days

Team target: at least 5 reactive jobs completed every working day. A shortfall is reported to management at 9:30 the next morning. Never mark a job complete that is not.

ACCOUNTABILITY

Messaging residents about their repair

When you are booked on a repair, the resident can message you about it from Nicholson Living, and you reply from My jobs. It replaces phone calls and texts: arrival times, access, parts and anything you need from them, all on the job's record.

1 **Open the job in My jobs**
A job with a resident message shows **Message [first name]** with a count of unread messages. It turns red when your reply is overdue.

2 **Reply by 17:00 the same working day**
A message sent after 17:00 or at the weekend is due by 17:00 the next working day. You are emailed when a resident writes to you.

3 **Keep it to the job**
For example: “On my way, there in 20 minutes”, “Please leave the bathroom clear”, “I need to come back Thursday for the part”.

4 **Complete the job as normal**
Once the job is complete, the conversation closes and becomes read-only. It stays on the job's history.

First names only	The resident sees your first name; you see theirs. Never give out your number or ask for theirs.
Everything is read	The office can read every message, and can step in as “Nicholson office”.
Unanswered by 17:00	Kevin Sharp is emailed, or Paul if the job is Kevin's. Reply times count at appraisal.
Service with Respect	Polite and professional every time. Never discuss rent, other residents or company business.
Not about the job?	Point the resident to Messages in their app, which goes to the office.

EVERYONE HOME SAFE

Health and safety

Someone seriously hurt? Call 999 first.

Then phone Kevin Sharp and report it in Accident & near miss the same day. Do not disturb the scene unless it is needed to make it safe. You have the right to stop any work you believe is unsafe, without suffering any detriment. If you suspect asbestos: stop, keep others away, report it.

Site induction & RAMS

1. Open **Site induction & RAMS** and choose the site.
2. Open and read each document listed.
3. Tick each one, confirm you understood it and will follow it.
4. Tap **Sign induction**. You see **Signed. You can now clock in**.

Report an accident or near miss

1. Choose: someone was hurt, near miss, damage to property or unsafe condition.
2. Enter the date, time and what happened, step by step.
3. Add who was hurt, the injury, first aid given and by whom, and witnesses with phone numbers.
4. Tick anything serious that applies.
5. Tap **Send report**. It goes to Kevin and Paul as urgent, and you can follow it in My requests. Paul reports to the HSE where the law requires.

Lone working

1. On arrival, check in with the property and your expected finish time.
2. Tap **I'm safe** during the job, or extend if it runs on.
3. Tap **Check out** when you leave.
4. Not checked out 30 minutes after your finish time? Kevin is alerted and will call you.

Uniform & PPE

1. Add items and sizes: boots, polo, softshell, gloves, glasses, masks, ear defenders, hard hat.
2. Tap **Send request**. It goes to Paul to approve; Kevin sees it. Follow it in My requests.
3. When issued, sign the PPE statement. Report loss or damage here straight away and never use defective PPE.

Training & tickets

1. Upload each card or ticket with its expiry date: Gas Safe, asbestos awareness, first aid, fire marshal, working at height, abrasive wheels, manual handling and others.
2. Renew anything showing **Expires soon**.
3. Callum Hesketh keeps the records.

Site files

Health & safety holds our policy (handbook Part F) and each site's documents. The Pilkington's Canteen HSE file is Rev B, issued for construction on 13 Oct 2026. Everyone reports to the site cabin before entering the works. Kevin Sharp is site manager, fire marshal and first aider; Robbie Foster is second first aider.

WORK MENU

Work tools

Materials & orders

1. Request materials against the job, with the date needed by.
2. Paul Nicholson approves every order, whatever the amount, and the order number appears in My requests.
3. Quote the order number at the counter. Nothing is bought without one.
4. Photograph the receipt the same day so the cost lands on the right scheme.

Keys & tools

1. Sign the key out when you take it, with the time it will be back.
2. Sign it back in the same day.
3. Never copy, share or keep keys or codes overnight without Kevin Sharp's say-so.

Daily van check

1. Before the first journey, check all ten items: tyres, lights, brakes, windscreen and wipers, mirrors, fluids and leaks, dash warning lights, bodywork, load, first aid kit and extinguisher.
2. Photograph any new damage.
3. Tap **Submit check**. A failed item marks the van off the road.

Void forms (SOP-V01)

1. Open the form for the stage you are at, from pre-checkout through to the incoming tenant walk-through.
2. Tick every item and add photos.
3. Sign the form. Any failed item is sent to Kevin as a request.
4. The property is released for letting only when every form is signed and the Quality Audit passes.

Compliance & audits

1. Log each weekly fire alarm test: alarm sounded throughout, or fault found.
2. A fault goes straight to Kevin as urgent.
3. Complete property audits: gas safety, EICR, EPC, alarms, fire doors, communal areas and licence display.

Work orders & invoices

Subcontractors

1. Each job is offered as a work order you are free to accept or decline.
2. Only Paul Nicholson or Kevin Sharp may issue, vary or cancel a work order.
3. Invoice each week by 12:00 noon on Monday for the week before, in NicoNet. Paul approves it and Callum processes it; follow it in My requests.
4. Keep your insurance, CIS registration and tickets current.

MY RECORDS

Holiday, absence and your file

Book holiday

1. Open **Holidays**, choose **Holiday (from the 20 days)**, then your first and last day.
2. The app counts the working days, excluding bank holidays.
3. Tap **Request holiday**. It goes to Paul and Callum and shows in My requests.
4. Watch the status change from pending to approved.

Book your birthday off

From 1 Jan 2027

1. Open **Holidays** and choose **Birthday day off (does not use holiday)**.
2. Pick your birthday. If it falls on a weekend, a bank holiday or a blackout day, pick another working day in the same month.
3. Tap **Send request**. It goes to Paul and Callum like any holiday, and shows as **Birthday** on the calendar.
4. One birthday day off a year, paid, and never taken from your 20 days. It cannot be carried over or paid out (handbook Part B11).

Report sickness

1. By 07:30 on your first day off, open **Sickness**.
2. Enter the first day off and when you expect to be back.
3. Tap **Report sickness**. It goes to Kevin and Paul as urgent; they answer within the hour.
4. Off more than 7 calendar days? Upload a fit note.

Return to work

1. On your first day back, open the form due.
2. Say whether you are fully fit, or fit with adjustments.
3. If work caused or worsened it, also report it under Accident & near miss.
4. Send it. It goes to Kevin and Paul to countersign.

Request a 1-2-1

1. New starters do not need to: your week-one 1-2-1 with Paul is booked automatically. After that, ask any time.
2. Choose the manager you want to meet and say what it is about.
3. They reply in My requests with a date and time within two working days.
4. Only that manager and Paul see what you write.

Vehicle declaration

1. Choose company van or car, or your own vehicle.
2. Enter the make, model, registration, licence number, photocard expiry and penalty points.
3. Own vehicle: confirm it is taxed, has an MOT and is insured for business use (Class 1 or higher).
4. Sign it. Give a DVLA check code when asked, at least every six months.

Right to work

1. Choose British or Irish passport, share code (eVisa or EU Settlement Scheme), or other documents.
2. Upload the document or enter the share code.
3. Tap **Submit for checking**. It goes to Callum Hesketh, who confirms in My requests.

Payslips & P60s

Your payslip each pay day and your P60 after each tax year, from Nicholson Employment Services Limited, kept for six years. Subcontractors see CIS payment and deduction statements here.

Appraisals

In January for the previous year, with a check-in in July. Complete your self-appraisal first. Your manager scores each area with you in the meeting; you can comment and must sign the record. Kevin appraises trades, maintenance and construction; Paul appraises Kevin and Callum.

Absence is tracked with an absence score. The stages are an informal conversation with your manager, a formal attendance meeting, a second formal meeting and a final review. Absence related to disability, pregnancy or maternity is not counted. Holiday, sickness, return to work, 1-2-1s, appraisals and events are for employees; subcontractors see what applies to their framework agreement.

COMPANY MENU

Who we are

Welcome from Paul

Paul's welcome video and the one-minute guide to the app.

New starter induction

Paul's induction film, your first morning at Nicholson HQ step by step, your first weeks (your line manager, your week-one 1-2-1 with Paul, recognition, your birthday off and where you can progress), and your Induction File to open or print.

Refer a friend

Know someone good, someone you would be proud to work alongside? Refer them with their name, number, trade and how you know them, once they have agreed to be contacted. If they join as an employee and complete their probation, you receive a refer-a-friend bonus through payroll. Full rules in handbook Part B11.

Culture Code

Our ten principles, from pride in everything we do to no drama, no blame, no toxicity. Type your full name to sign it.

Staff handbook

Read and sign each part. Parts marked contractual form part of your contract of employment. Part B11 covers your first weeks, progression, your birthday day off and refer a friend.

Policies & sign-off

Each signature is recorded with the date, time and version on your file. You sign again when a statement changes.

Organisation chart

Who does what. Instructions come only from Paul Nicholson or Kevin Sharp unless Paul authorises someone else in writing. Callum Hesketh handles HR administration, compliance, certification, uniforms and debt collection.

Staff events

Toolbox talks, training and socials. Tap **I'm going**.

Feedback & Employee of the Month

Monthly feedback is anonymous; your name is not stored with it. Nominate a colleague and say what they did.

IN RESIDENTS' HOMES

Standards

Access refused	Never force entry. Leave and report it.
Payments	Never take any payment from a resident.
Conversation	Do not discuss rents, other residents or company business. Point residents to the Nicholson Living app for anything about their tenancy.
Smoking	No smoking or vaping in any home, communal area or company vehicle.
Courtesy	Treat residents, colleagues, contractors and the public with courtesy and respect, as Service with Respect sets out.
Alcohol and drugs	Never work under the influence.
Contact with residents	Only through the job's messages in NicoNet. Never swap phone numbers, WhatsApp or social media with a resident.

Emergency line	Never give out the emergency engineer's number. Residents use the Emergency tile in their app.

SUPPORT Help

My sign-in code has not arrived	Check junk. Make sure you used your registered work email. If it is wrong, ask Callum Hesketh to update it.
It says I am not at a permitted site	Check location is on for the app with precise location allowed. Step outside or near a window and try again, then use Ask for a manual clock-in.
A job looks wrong or is missing	Message the office in the app. Do not start work that is not on My jobs.
I have a question as a new starter	Ask your line manager through NicoNet, however small. That is what they are there for.
Nobody has answered my request	Check My requests. If it still says Waiting after its answer-by time, it has already gone to Paul. Do not send it again.
Questions about location data	Read Location & privacy, linked at the bottom of NicoNet, or raise it with Paul Nicholson or Kevin Sharp.

UPDATE · 7 NOVEMBER 2026

Polish with Claude

> Every message box in NicoNet now has Polish with Claude. It tidies your wording so it reads clear and professional, in your own voice.

Where it is

- **My jobs › Messages with the resident** – the button reads **Check & send**. The first press has Claude check your reply (and take out any phone number, email or surname); read it, then press **Send**.
- **Message the office** and **Request a 1-2-1** notes.
- **My requests** – your replies on anything you have sent.

How it works

- Claude keeps every fact, time and request exactly as you wrote it. A genuine concern, grievance or safety report is never softened – just put courteously.
- Nothing is sent until you press Send. Tap **Undo** to put your own words back.

Polish keeps every fact, date, time, amount and commitment exactly as written and adds nothing new. It fixes spelling and grammar and takes out rudeness, sarcasm and shouting.

Nicholson Living™, NicoNet™ and NicoMGT™ are trade marks of PJN Holdings Limited.

UPDATE · 14 NOVEMBER 2026 · MY JOBS

Closing a maintenance job

> Every maintenance job is closed the same way: clock on, before photo, clock off, after photo, complete. A job cannot be closed until every step is done – NicoNet will not let it.

Where

- Open **My jobs** (today's jobs are listed first). Agree the appointment on the card – press **Agree** on a time the tenant suggested, or offer up to three. The job, its repair report and photos, and the agreed time are all on the card, with a **Site visit** box of five steps; each opens when the one before it is done.
- Tenant messages on the job are answered in NicoNet the same working day.

The five steps

- **1. Start job.** Press it when you arrive and are about to start. The clock starts, the appointment is marked attended and the resident is told you have arrived.
- **2. Before photo.** The camera opens. Photograph the fault before you touch anything. Take as many as you need.
- **3. Stop clock.** Press it when the work is finished. It will not stop until there is a before photo.
- **4. After photo.** Photograph the finished repair from the same angle as the before.
- **5. Job report.** All four are required: **(1)** the issue and your diagnosis; **(2)** what you did to resolve the repair (use **Polish with Claude** – the resident reads 1 and 2); **(3)** materials used ("None" if none); **(4)** tick to confirm **the repair worked when tested**. Then **Complete job**.

If you can't finish on this visit

- Stop the clock, press **Couldn't finish on this visit** and choose **Delayed** or **Not completed** with the reason (part ordered, no access to the room). When you go back, press Start job again: each visit has its own clock and photos.

After you complete it

- The resident is told in Nicholson Living what you found, what you did and that it was tested, by whom, the time on site, with your before and after photos, and is asked to rate the repair.
- Management reviews every completed job. The card then shows **Signed off** – or **Sent back**: the job comes back on your My jobs with what needs putting right, and you get an alert.

Rules

- Start the job only when you are at the property. Your position is recorded when you start and stop, and the times are checked against the appointment.
- Photos are taken there and then with the camera. Once saved they cannot be changed or deleted.

Office logins see the same five steps in NicoNet. NicoMGT cannot close a maintenance job without them either.

Voids team: Move-In Prep and hand-over

> Your void work arrives in NicoNet as an online Move-In Prep from your manager. You put right every line, follow N3 Voids every time, and finish by certifying the home ready for the cleaner. That certificate is yours.

Receiving the work

- An alert and push tell you a Move-In Prep has been issued to you. Open **Work › Move-in prep**. Each prep shows the address, the date it must be ready, the move-in date and any promises made to the incoming tenant.
- Watch the manager's **walk-through video** first – it points at every issue so there is no doubt. Then read each **line**: room, what is wrong, the trade, and a clip or photo of the issue.
- Anything beyond normal void work (new floors, a kitchen, joinery) is raised by the manager as a separate extra-works job for the right trade, finished at least 24 hours before move-in. It is not on your prep.

Doing the work

- Put each line right and tick it with an **after photo** – the line cannot be ticked without one. Lines the manager sends back reappear with what is wrong.
- Follow **N3 Voids** (SOP › Voids) every time, in full. These are our standard operating procedures: non-negotiable, whether or not they are on the prep.
- **Found a defect that is not on the prep and you can't fix it?** Press **Report a defect now** on the prep. The office is alerted immediately so it can be put right without affecting the move-in.

Hand-over: you certify it

- Confirm each statement: every line done with an after photo; every issue in the video put right; N3 Voids complete; **appliances switched on and working, hot water running and every socket tested**; materials and tools removed with a brush and wipe through; keys back at the office.
- Type your full name and press **I verify – hand over to the cleaner**. You are certifying the work is complete – checked and triple-checked. Once pressed, it is on you.
- The cleaner is instructed automatically and management is alerted. Management audits your before and after photos and passes it, or sends lines back to you with the reason.

Don't press hand-over until you would be happy for the tenant to walk in. The cleaner should never have to call you back.

Cleaning: the move-in clean

> You are last in the home. How you leave it is how the tenant sees it, and it forms their impression of us, the team and the brand. Every clean follows N3 Cleaning and the Cleaning Matrix, every time.

When you are instructed

- When the voids team certify their work complete, you get an alert and the clean appears in **My jobs** as **V5** on that void. They will not need access again.

The clean, step by step

- **1. Start job** when you arrive (clock on). **2. Before photos** of every room as you find it. **3.** Clean to **N3 Cleaning** (SOP › Cleaning) and the Cleaning Matrix. **4. Stop clock. 5. After photos** of every room from the same angles.
- **6. Cleaning Matrix:** mark every line **Done** or **N/A** – kitchen, bathroom, bedrooms and furniture, throughout, finish, and the **communal areas**. If you follow the Matrix, every element is covered: it is built from every complaint we have had.
- **7.** Write what you did and press **Finish clean**. The Matrix and your photos go to management in NicoMGT, and the manager is told the quality check is due.

Communal areas – first impressions start at the main door

- Every move-in clean includes the communal entrance, stairs and landings: clean, organised and smelling fresh. Fresh water every time – a dirty-mop smell or dirty communal floors will put a tenant off however good the home looks.

After you finish

- Management reviews your photos and Matrix, then the manager does the Move-In Quality Check. Anything that fails comes back to your My jobs with the reason.
- Can’t clean something to standard? Tell the office the same day so it is put right before move-in.

No Matrix, no release: the clean cannot be finished without the clock times, before and after photos and every Matrix line.

Extra works and void rules

> Works beyond normal void work are raised early – at the check-out inspections wherever possible – so they are done during the outgoing tenant's notice period and never left to the last day.

Works beyond void work

- New floors, a kitchen, joinery – anything beyond normal void work. The manager (or whoever has the check-out inspections V1, V2, the final check-out V3 or the Move-In Prep V4) raises it in the **Works beyond void work** box: what needs doing, the detail, the trade, the **responsible person** and the due date.
- It becomes an extra-works job (W1, W2…) straight into that person's My jobs, with an alert to them and to management. Due date: at least **24 hours before move-in** – NicoNet will not accept a later date.
- Extra-works jobs are closed like maintenance: Start job, before photos, Stop clock, after photos, what you did, Complete job. Management signs them off.

Rules

- A Move-In Prep cannot be submitted, and V1, V2 and V4 cannot be completed, until works beyond void work are raised or **No works beyond void work** is confirmed.
- V4 cannot be completed while any extra works are unallocated, have no due date, or are due later than 24 hours before move-in.
- Any extra works still open on their due date are alerted to management at 07:25 every morning.
- The Move-In Quality Check (V6) cannot be started until the clean and every extra-works job are complete.

There is a month's notice period and then the void itself to put things right: nothing should be left for the tenant to find.

Move-In Quality Check

> The manager's final check before a home is let, done in NicoNet on the V6 card. It replaces the paper Move In Quality Check and ends with a certificate that the home is perfect and ready for occupation.

When

- It opens once the clean (V5) and every extra-works job are complete. You get an alert when the cleaner finishes.

The check

- Walk the whole home. Twenty-nine items in seven areas: clean and presentation; decoration and fabric; windows, doors and keys; services and safety; furniture and furnishings; communal and external; the incoming tenant.
- Answer every item **Pass**, **Caveat**, **Fail** or **N/A**. Anything other than Pass needs a note.
- **Caveats** are things that are acceptable but not perfect, or could not be checked – for example "the kitchen worktop is not in perfect condition and may be noticed by the tenant" or "no gas at the property, so the heating could not be tested". Record them in the caveats box (**Fill from the items marked Caveat** does it for you).

Certify

- Tick the certificate: you personally inspected the home today, it is in perfect condition, clean, safe and ready for occupation, and every Nicholson standard is met, subject only to the caveats recorded. Press **Certify ready for occupation**.
- V6 is completed, NicoMGT is told it is ready, and the caveats appear on the V7 Move-In Meeting card to go through with the tenant.

If anything fails

- A home with a failed item cannot be certified. Press **Submit as not ready**: NicoMGT is alerted, the item is put right, and you check again.

Your name, the time and your phone's position are recorded with the certificate. V6 can only be completed by certifying this check.
